# Letter from Partners

November 2018

Dear Rowan County Citizens,

Rowan County is a county of historical significance to our great state. It is branded with the uniqueness for originality and sustained by the contributions of many. Our willingness to partner and rally together is one of our main strengths of why we have been and will continue to be so successful.

Since 1991, Rowan County United Way, Novant Health Rowan Medical Center, Rowan County Health Department, and this year Healthy Rowan, have joined together to analyze the health and well-being of our community. The partnership underscores the importance of working together to make measurable improvement in the quality of life for all citizens in Rowan County.

This process, which occurs every three to five years, is a comprehensive community examination known as the Rowan County Health and Human Service Needs Assessment. It gathers information from citizen opinion surveys, focus groups and statistical data. This information helps our community to identify the health and social needs within our community.

As part of this process, both guidance and leadership were provided through an Advisory Committee consisting of representatives from the Blanche and Julian Robertson Foundation, City of Salisbury, Rowan Department of Social Services, Rowan Salisbury Schools, Rufty-Holmes Senior Center, Smart Start Rowan, as well as the four previously mentioned partners. Broad community involvement by non-profit, government, education, and business organizations occurred through a series of Steering Committee meetings. The many hours volunteered by the Advisory Committee and the input provided by Rowan County residents have been invaluable to this process. Additional funding support was provided by the Salisbury Community Foundation.

UNC Gillings School of Global Public Health has provided the expertise and capacity to support a multi-faceted project of this significance. It is with appreciation that we acknowledge their role with the assessment and report.

We hope the findings of this needs assessment will be used to focus our communities' energies and resources toward the creation and implementation of three action plans. By doing this, our community will grow and improve, while preserving the tradition of greatness and our desire to be an original.

It takes all of us working together to make a positive impact on the issues identified. Please join us in making Rowan County a healthier community for all.

Sincerely,

Bill Burgin  
*Rowan County United Way*

Jessica Ijames  
*Novant Health Rowan Medical Center*

Nina Oliver  
*Rowan County Health Department*

Alyssa Smith  
*Healthy Rowan*

# Acknowledgements

We would like to thank all the organizations, community stakeholders and residents of Rowan County who participated in the assessment process and helped us to select priorities aligned with the community's needs. We are grateful to residents for their generosity in sharing their perspectives and experiences in the Community Opinion Survey, the focus groups and the three Steering Committee meetings. Their gift enabled us to include their voice in this assessment.

We would also like to thank the members of our Advisory Group, who guided the assessment from beginning to completion through instrument review, survey collection, focus group hosting and coordination and action planning.

# Executive Summary

The social, economic and physical well-being of a community is affected by the way the community is built and resources available to residents as they live, learn, work and play. To use resources effectively, it is important to understand the strengths and weaknesses that exist, how people know about and access resources and what barriers exist that create gaps of unmet needs in the community.

## Leadership and Collaboration

To accomplish this, the Rowan County United Way worked with the Rowan County Health Department, Novant Health Rowan Medical Center and Healthy Rowan to do a community needs assessment with support from the North Carolina Institute for Public Health at the UNC Gillings School of Global Public Health. Between March and November 2018, agency and community partners completed a Community Health and Human Service Needs Assessment.

Image courtesy of Rowan County Tourism Development Authority

## Data Collection and Findings

As the Community Health and Human Service Needs Assessment progressed through phases, major milestones included establishing the Advisory Group and Steering Committee teams, developing a survey and doing door-to-door interviews with a representative sample of Rowan residents, collecting secondary data through publicly available sources and community partners and holding seven focus groups with selected groups of residents. The information gathered during this phase is summarized in Chapter 3: Assessment Findings.

## Priorities and Action Plans

The next phase's major milestones included hosting two Steering Committee meetings to examine and discuss the data findings. From the data presented, nine areas were selected as being the most critical areas for Rowan County to focus and act upon. Data on these focus areas were presented in a third Steering Committee meeting that was open to the public and attendees were asked to vote on the top three priorities. Following the selection of three priority areas, topic stakeholders for each area met to develop potential action plans. Information collected during this phase is found in Chapter 4: Community Priorities and Chapter 5: Prevention and Health Promotion Resources.

### Priority 1: Substance Use

Addiction to drugs or alcohol is a chronic health condition and those who suffer from it are at risk for early death, certain diseases, injury and disability. Misuse of prescription painkillers and use of heroin and opiates have increased dramatically nationwide, including in North Carolina and in Rowan County. Substance abuse can contribute to family instability, loss of employment, child neglect, poverty, involvement in the criminal justice system and violence.

- Illicit drug use, medication misuse and alcohol abuse were identified as the #1, #3, #7 top community issue in the Community Opinion Survey, respectively.
- One in five of respondents reported that a friend or family member had been affected by the use of prescription painkillers such as opioids or heroin. Of those, 43% said that their friend or family member did not seek treatment.

- According to the State Center for Health Statistics, the rate of opiate poisoning deaths for Rowan County is 20.9 deaths per 100,000 (2016). This is higher than both peer counties (16.4 in Davidson, and 18.91 in Gaston), and approximately twice as high as the State rate (11.7).

Existing resources identified during the Action Planning session included treatment centers in Rowan County, initiatives led by the Opioid Task Force and the Rowan County Health Department, a federally funded prevention program, and an upcoming conference for business and community leaders on whole person health. Needs identified as areas of opportunity for the community included additional treatment programs and facilities and the development of resources to be shared between and across agencies.

## Priority 2: Mental Health

Mental health includes emotional, psychological, and social well-being, and it is an important part of our lives. It affects how we function, what choices we make and how we interact with others. Mental health and mental illness are related, yet different. A person could be experiencing a poor mental health day, where they feel sad or anxious, but not have a mental illness. Mental health can change over time, and at different points in a person's life. Chronic mental illness, especially depression, can put someone at heightened risk for stroke, type 2 diabetes, and heart disease.

- In the Community Opinion Survey, residents reported an average of 2.9 days per month when their mental health was "not good." Thirteen percent of residents reported more than 20 days of poor mental health.
- Twenty-two percent of residents surveyed report being diagnosed with depression or anxiety.
- The 2016 suicide rate in Rowan County is 18.2 per 100,000 (Log Into North Carolina Database, 2016). The Healthy NC 2020 target is 8.3.

Resources identified sessions included existing mental health care providers. Opportunities for the county to expand beyond these providers might include additional facilities and programs, specifically to help the recently incarcerated population and combat mental health stigma.

## Priority 3: Healthy Lifestyle Behaviors

Chronic diseases are among the most common, costly and preventable health problems in the United States. Lifestyle risk factors, which include nutrition, physical activity, tobacco use and excessive alcohol consumption, all contribute to these diseases. Sufficient nutrition is important to human growth and development. However, excessive calorie intake can lead to obesity, which increases the risk of developing health conditions like type 2 diabetes, high blood pressure, heart disease, kidney disease and stroke. Increased physical activity helps reduce the risk of disease and contributes to mental well-being. Smoking is the leading cause of preventable death in the United States.

- The top four causes of death in Rowan County – cancer, heart disease, stroke and chronic respiratory disease – are all affected by health behaviors (NC Center for Health Statistics, 2018).
- One in four residents surveyed reported that they smoke cigarettes or use a tobacco product daily. Sixty-five percent reported they support a tobacco-free policy for the County.
- Nearly 1 in 10 of the survey respondents reported having cut or skipped meals or sought reduced cost community meals because there wasn't enough money for food.

Resources identified included existing city and county parks and recreation locations and programs, the three YMCA locations in Rowan County, as well as initiatives led by Healthy Rowan and the Rowan County Health Department to improve nutrition, increase physical activity and reduce tobacco and e-cigarette use. Programs needed included expanding access to nutritious food, promoting access to physical activity and developing a mechanism for agencies to collaborate.

# Chapter 1: Introduction

## The Community Health and Human Service Needs Assessment

A Community Health and Human Service Needs Assessment seeks to identify underserved populations or unmet need within a community and guide stakeholders in the prioritization of resources. Through the systematic collection of primary and secondary data, a needs assessment reveals both community resources and community deficits. It identifies trends, and compares county status to peer counties, the State and statewide targets to identify problem areas. This process informs the conceptualization of what issues exist and what community components can be leveraged to address them.

### Collaboration

A needs assessment is a powerful tool for all stakeholders and often includes partners from multiple sectors of the community. To avoid duplication among agencies and to streamline action efforts, the Rowan County United Way established a coalition with the Rowan County Health Department (RCHD), Novant Health Rowan Medical Center, Healthy Rowan and other community partners.

The RCHD completed their last CHA in 2015, and this 2018 assessment fulfills their requirements as mandated by NC Local Health Department Accreditation legislation.

As a tax-exempt hospital, Novant Health Rowan Medical Center is required by the 2012 Affordable Care Act (ACA) to conduct a community health needs assessment every three years.

For the Rowan County United Way and Healthy Rowan, the assessment process enables them to identify, measure and document health and human service needs to better serve Rowan County.

Additionally, over 80 individuals from Rowan County agencies and the community contributed leadership and participation to the Advisory Group and Steering Committee to complete a Community Health and Human Service Needs Assessment.

### Community Engagement

The community needs assessment process was designed to include and amplify the voices of the residents of Rowan County. Community members provided input through the Community Opinion Survey, which took place May 10-12, 2018 and various evenings May 22 through June 12, 2018. A total of 169 residents participated in the survey. The survey was rigorously designed with a 2-stage cluster sampling methodology to ensure the results are representative of and generalizable to all residents of Rowan County. Specific details about the survey are provided in Appendix A.

Seven focus groups were held between June 8, 2018 and June 22, 2018. Seventy residents of Rowan County participated in the focus groups. Specific details about the focus groups are provided in Appendix B.

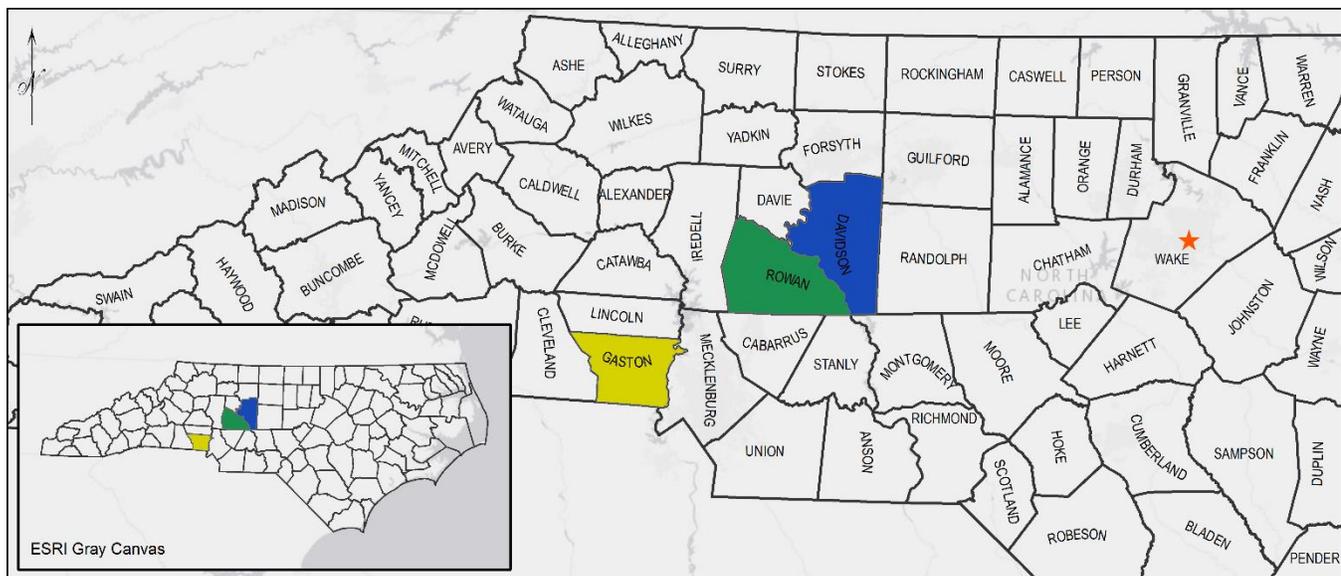

During the priority selection process, an open Steering Committee Meeting was held, and the public was invited to come hear a data presentation and vote on three priority areas. Over 50 residents, community organization leaders and community stakeholders gathered to review data on nine focus areas and vote on the top three priorities. These priorities were then approved by the Advisory Group.

# The Community Needs Assessment Process

A needs assessment collects information and data on the county from three main sources: secondary data, primary data and community input. Secondary data are gathered from existing repositories, including federal, state and local government entities, as well as the nonprofit sector. A table of sources is available in Appendix C. Secondary data are collected for the assessment county as well as peer counties, to allow comparison between similar counties. Primary data are gathered from the county itself through a mixed-methods approach of quantitative and qualitative data. The findings from the data are then presented back to either the community or both the community and community stakeholders together for their input on how the data compare to or reflect their experience of living and working in the county. Assessment leadership then determines priorities and writes action plans to address the needs identified through the assessment process.

The peer counties, Davidson and Gaston, were selected for their geographic proximity and demographic similarity to Rowan County. Data points were also compared to the State's Health Improvement Plan, Healthy N.C. 2020, where applicable.

Figure 1: Map of Counties in North Carolina

The North Carolina Department of Health and Human Services recommends eight standard steps for completing the assessment. The eight steps are:

1. Establish a community needs assessment team
2. Collect primary data
3. Collect secondary data
4. Analyze and interpret primary and secondary data
5. Determine health priorities
6. Create the report document
7. Disseminate the report document
8. Develop community action plans

# Chapter 2: Rowan County Community Profile

## History and Geography

The area today known as Rowan County was formed in 1753 from land broken off from Anson County. It was named after Matthew Rowan, the governor of North Carolina from 1753-1754. The Saponi and Catawba tribes resided in present-day Rowan County prior to arrival of predominately German and Scotch-Irish settlers in the mid-1700s. Rowan County is located in Western North Carolina, and borders Cabarrus, Davidson, Davie, Iredell and Stanly counties. Rowan County is made up of approximately 511 square miles of land and 12 square miles of water. Rowan County shares its largest body of the water, High Rock Lake, with Davidson County.

The county consists of the 11 municipalities of China Grove, Cleveland, East Spencer, Faith, Gold Hill, Granite Quarry, Kannapolis, Landis, Rockwell, Salisbury and Spencer. Salisbury, the seat of county government, is situated near Interstate 85, approximately 45 miles north of the city of Charlotte, NC, and 52 miles south of the city of Greensboro, NC.

## Economy

The North Carolina Department of Commerce designated Rowan County a Tier 2 county in 2018, indicating it is moderately economically distressed compared to other counties in the state. Historically, Rowan County has been home to several large textile mills which provided much of the employment opportunity. These included the Salisbury Cotton Mill, founded in 1894, and then followed by the Vance Cotton Mill and the Kesler Cotton Mill. This industry reached its height in the 1970s and has been in decline since. In 2003, the abrupt closing of the Pillowtex Corp. in the biggest textile shutdown in the United States history cost nearly 5,000 jobs in North Carolina, and two mills and more than 700 jobs in Rowan County specifically. Today, the top three employment sectors include health care and assistance, manufacturing and retail trade. The largest private employer is Food Lion, which is headquartered in Salisbury. The largest public employer is the Rowan-Salisbury School System.

## Demographics and Population Trends

Based on 2016 US Census Bureau estimates, the population for Rowan County is 139,933. The median age is 40.7 years. Rowan County has the lowest percentage of females (50.7%) and highest percentage of males (49.3%) compared to the State and peer counties.

Table 1: General Demographic Characteristics, 2016

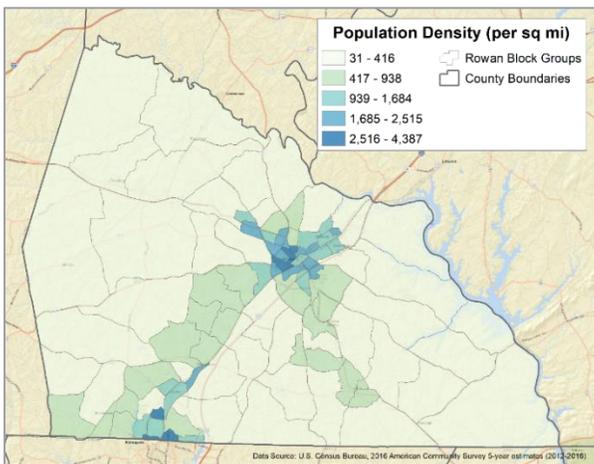

Location	2016 Total Population	Number Males	Population Male (%)	Median Age Males	Number Females	Population Female (%)	Median Age Females	Overall Median Age
Rowan County	139,933	68,993	49.3	39.3	70,940	50.7	42.1	40.7
Davidson County	164,926	80,522	48.8	41.5	84,404	51.2	43.6	42.6
Gaston County	216,965	104,778	48.3	38.7	112,187	51.7	41.5	40.1
State of NC	10,146,788	4,932,952	48.6	37.2	5,213,836	51.4	40.1	38.7

Source: US Census Bureau, American FactFinder, PEPSR6H: 2016 Annual Estimates of the Resident Population.

Population is steadily growing in Rowan County. From the years 2000 to 2010, Rowan County experienced a 6.2% growth, compared to Davidson County (10.6%), Gaston County (8.3%) and the state (18.5%). Population in Rowan County is projected to continue to grow, although at a lower rate of 4.6%, between 2010 and 2020.

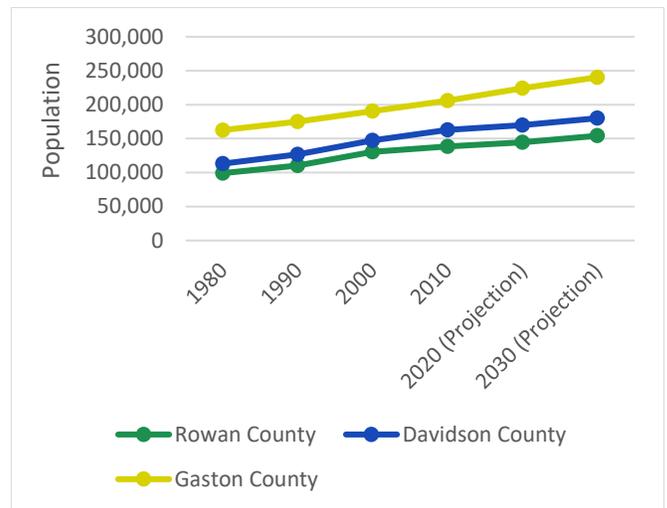

On a trend comparable to both peer counties and the State, the percentage of the population age 65 and older is growing and projected to grow at a rate of 29.9% between 2010 and 2020. As of the 2010 US Census, 14.4% of the County's population was over 65, and that is projected to grow to 21.6%, or 1 in 5 residents, in 2030. Average life expectancy for persons born between 2014-2016 is 75.3 years (NC Center for Health Statistics). The Healthy NC 2020 target for life expectancy is 79.5 years.

**Figure 2: Population Density (population per square mile), by U.S. Census Block Groups, 2012-2016**

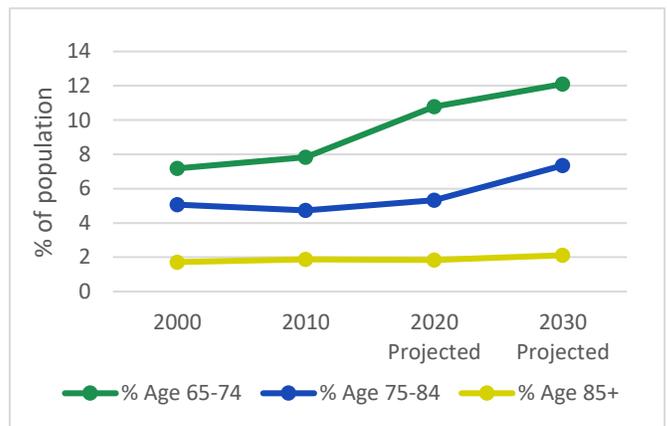

Source: US Census Bureau, American Community Survey, 2016 5-year estimates, Table B01003 Total population, Block Group, Rowan County; <http://factfinder2.census.gov>.

**Figure 3: Population Growth Trends**

Source: Log Into North Carolina (LINC) Database, 2018

**Figure 4: Elderly Population Growth Trends**

Source: US Census Bureau, American FactFinder. Profile of General Demographic Characteristics: 2000, 2010

## FOCUS GROUP FINDINGS

*The Seniors and Elderly focus group were concerned by increasing crime and the performance of public schools. Access to transportation, nutritious meals, and community resources were also concerns for them specifically as seniors. They identified Rufty-Holmes Senior Center as a community asset which enabled them to socialize, find resources, and eat healthy foods. They prioritized reducing violence, sharing information on resources, and education on living a healthy lifestyle.*

## HEALTHY NC 2020 OBJECTIVE

**Objective: Increase average life expectancy (years).**

**Target: 79.5**  
**Rowan: 75.3\***

\*For persons born between 2014 and 2016.

The birth rate in Rowan County has declined from 12.5 per 1,000 women to 11.4 per 1,000 women between 2005 and 2016. According to the NC State Center for Health Statistics, the 2012-2016 five-year estimate shows variation in the birth rate by race and ethnicity. Hispanics accounted for 65% of the county's growth between the 2000 and 2010 censuses. The Hispanic population grew from 5,369 in 2000 to 10,644 in 2010 (NC State Center for Health Statistics, Health Data, County Level Data, County Health Databook, 2018; US Census Bureau, 2000 Census, 2010 Census).

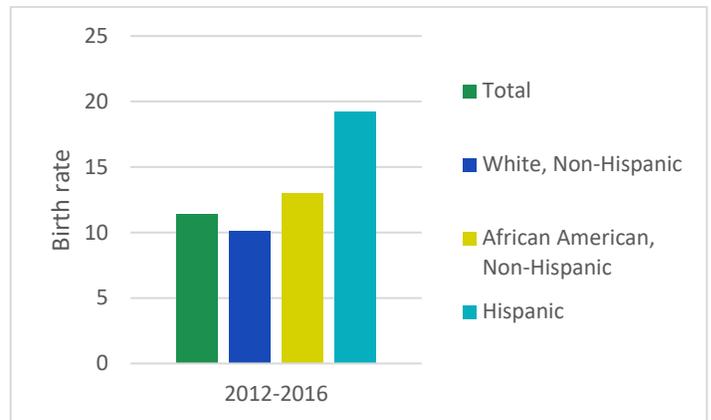

**Population Growth**  
Hispanics accounted for **65%** of the County's growth between 2000 and 2010

According to the US Census Bureau 2016 estimates, 4 out of 5 Rowan County residents are non-Hispanic white, while 16.0% are Black or African American, 0.3% is American Indian or Alaskan Native, 1.1% are Asian, Native Hawaiian, or Other Pacific Islander. Within Rowan County, approximately 8.4% of residents are Hispanic or Latino of any race.

### FOCUS GROUP FINDINGS

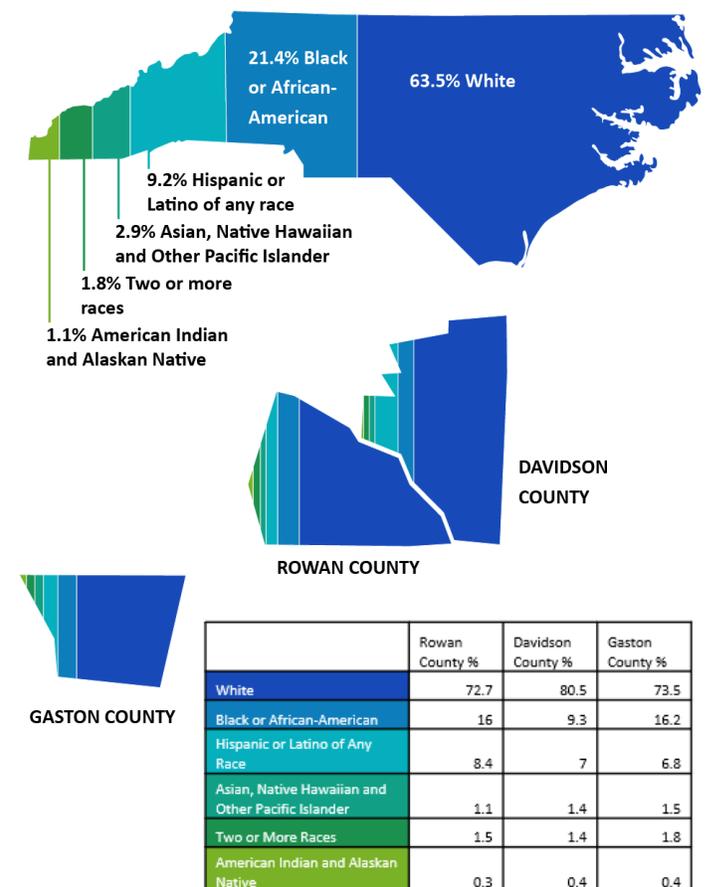

*The Hispanic/Latinx focus group identified crime, racial tensions, bullying and drugs in school, and lack of good job opportunities in Rowan County. Participants also discussed the difficulty of making medical appointments as a barrier to health services, and concerns about immigration status and the lack of information in Spanish being barriers to people seeking help. This group also identified the burden of unaffordable health insurance on the household budget, and the complementary priority of access to preventative health care. Their priorities included transportation, improving race relations, safety, more educational programs and more local jobs with better wages.*

Figure 5: Birth Rate by Race and Ethnicity

Source: NC State Center for Health Statistics, Health Data, County Level Data, County Health Databook, 2018

Figure 6: Percent of Population by Race/Ethnicity, 2016

Source: US Census Bureau, Population Estimates: 2016 Annual Estimates of the Resident Population by Sex, Race, and Hispanic Origin.

The US Census Bureau estimates that veterans make up 9.1% of the population age 18 and older, slightly higher than Davidson (8.5%) and Gaston (8.6%), but comparable to the State (9.0%). Of the veteran population, 6.2% is 18-34 years, with the remainder fitting equally into 35-54 years, 65-74 years, and >75 years (US Census Bureau, 2012-2016 American Community Survey 5-Year Estimate, Veteran Estimate).

Rowan residents **65-74 years of age**  
living with a disability: **29.5%**

Of the civilian noninstitutionalized population, 15.9% live with a disability such as hearing, vision, cognitive, ambulatory, self-care or independent living difficulty. One-third (29.5%) of Rowan residents 65-74 years, and over half (54%) of the 75 years and older population lives with a disability (US Census Bureau, 2012-2016 American Community Survey 5-Year Estimates, Disability Characteristics, S1810).

Rowan residents **75 years and older**  
living with a disability: **54%**

## FOCUS GROUP FINDINGS

*The focus group conducted with persons living with physical disabilities found specific concerns around access to transportation, access to healthcare, availability of adequate nutrition, financial instability and social isolation. This group reported being highly reliant on either neighbors, family, or public services to be able to get to healthcare appointments or to purchase groceries, which caused fear and insecurity. They valued their independence, but felt that the public assistance programs were very difficult to navigate and did not adequately address their needs for care in the home. Additionally, this group noted concern that pain medication would be more difficult to access due to response to the opioid crisis.*

## Other Vulnerable Populations

Age, socioeconomic status, disability, and English language proficiency can influence a population’s physical, emotional, social, and economic wellbeing. The following table presents a summary of populations who may be more vulnerable in Rowan County.

**Table 3: Vulnerable Population Groups in Rowan County, 2012-2016**

Age	% of Total Population	Other Characteristics	% of Total Population
<5 years old	5.7%	Uninsured (all ages)	12.7%
5 to 19 years old	19.5%	Living below poverty line	18.0%
>65 years old	16.3%	Disabled	15.9%
		Language spoken at home a language other than English	21.1%

Sources: US Census Bureau, 2012-2016 American Community Survey 5-Year Estimates, Demographic and Housing Estimates; US Census Bureau, Small Area Health Insurance Estimates (SAHIE), 2016; US Census Bureau, 2012-2016 American Community Survey 5-Year Estimates, Selected Social Characteristics in the United States.

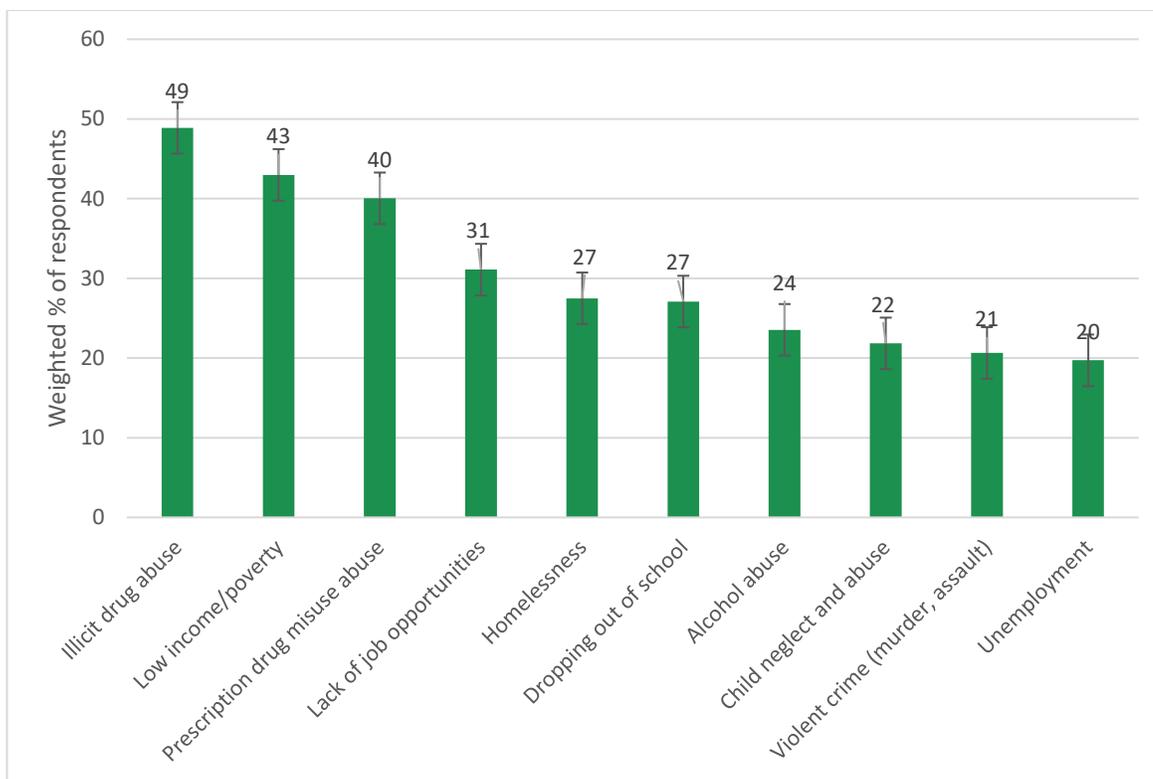

# Chapter 3: Assessment Findings

## Community Concerns

During the primary data collection phase, community members were asked to share their top concerns on the Community Opinion Survey and in the focus groups.

Two questions from the 2018 Community Opinion Survey asked residents to select from a list provided the top three issues that they believed most affected the quality of life in Rowan County. The first asked about community issues or services, the second asked about health and safety. Combined and ranked, Figure 7 represents the top 10 community concerns reported by Rowan County residents from available choices. Because respondents were asked to pick three, percentages will exceed 100%.

**Figure 7: Top 10 Combined Community Concerns**

Source: Rowan County Health and Human Service Needs Assessment, 2018

The focus groups were not given a list of top quality of life and health and safety concerns, but were instead each asked an open-ended question about what things concern them most about living in Rowan County. Table 4 presents the top concerns identified from all the focus groups, with each dot indicating that focus group participants brought up and discussed it. Not all issues were brought up in every focus group.

Table 4: Top 10 Concerns from Focus Groups

Focus Groups	Illicit and Prescription Drugs	Unemployment	Crime and Violence	Racial Inequality	Transportation	Youth Development and Education	Affordability of Services	Access to Healthy Nutrition	Poverty	Access to Housing

## TOP PRIORITIES AS IDENTIFIED BY FOCUS GROUP PARTICIPANTS

- Employment
- Violence and Safety
- Health Accessibility
- Transportation
- Community Resource Referrals and Education

Near the end of the discussion, participants were asked to reflect on all the concerns they had talked about that day and to share what they would prioritize (Table 4). Each priority area or concern in Table 4 reflects a number of factors that impact that topic. For example, employment included the availability of local jobs, specifically jobs that provide health benefits and are accessible by public transportation, higher wages, removing criminal record barriers to employment, and creating a workforce that is attractive to employers. Violence and safety included reducing gun violence, drug use, gangs, elder abuse, school shootings, and increasing law enforcement funding. Health accessibility included the availability of affordable insurance and the cost burden of health care, the language barriers to

care, and participants recommended an increase in number of free clinics and reducing the eligibility barriers to federal and State assistance programs. Transportation touched many of the other areas, but primarily the discussion focused on increasing rides in rural areas, making ridership easier for those who speak English as a second language, and increasing the availability and reducing the cost of demand rides for the elderly and disabled. Finally, discussions that identified the community resource referrals and education recommended that there be more work done to share community education on how to live healthy lifestyles, as well as information on what resources, services and programs the community offers.

## Social and Economic Indicators

Indicators on income, education, transportation, crime and housing illustrate how well the community is doing at meeting social service needs.

## Income and Employment

The 2016 American Community Survey estimated that the median per capita income for Rowan County was \$22,463, compared to Davidson (\$23,146), Gaston (\$23,710), and the State (\$26,779). Projected median household income was \$44,494, nearly even with Davidson (44,469) and Gaston (44,288), but below the State (\$48,256).

Sixty-three percent of working residents of Rowan County work within the county, whereas 35% commute to another county. For comparison, 47% of Davidson and 58% of Gaston residents work within county (US Census Bureau, American FactFinder, 2012-2016 American Community Survey 5-Year Estimates, Table B08007: Sex of Workers by Means of Transportation to Work. County, North Carolina).

### INCOME/EMPLOYMENT ISSUES IDENTIFIED AS AFFECTING QUALITY OF LIFE \*

- 43%:** Low income/poverty
- 31%:** Lack of job opportunities
- 20%:** Unemployment

\*Percentage of respondents to the Community Health Opinion Survey who identified each issue as one of the top three affecting the quality of life in Rowan County.

**Table 5: Top 5 Employment Sectors, Rowan County**

Sector (Major Employers)	% of Total Employment in Sector
Health Care & Social Assistance (Novant Health, Bayada Home Health Care Inc., etc.)	19%
Manufacturing (Freightliner Corp, Continental Structural Plastics, etc.)	17%
Retail Trade (Food Lion, Wal-Mart Associates Inc., etc.)	11%
Accommodation & Food Services (McDonalds, etc.)	9%
Transportation & Warehousing (R & L Carriers Shared Services LLC)	8%

Source: NC Department of Commerce, Economic Intelligence Development System (EDIS), Business Data, Top Employers, by County 2017 Q4; <https://www.nccommerce.com/lead/data-tools/industry/top-employers>

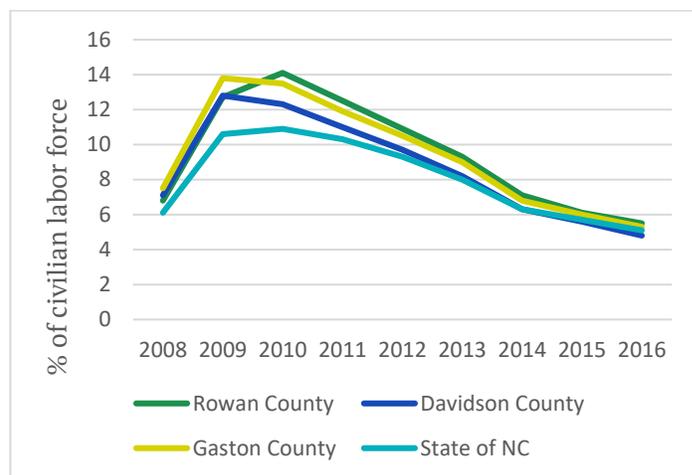

While unemployment has steadily declined since the Great Recession, poverty levels have remained largely unchanged (Figure 8, 9). Rowan County remains comparable to both peer counties and the State in these measures. The Healthy NC 2020 target is to reduce the number of individuals living in poverty to 12.5%, but as of 2016, 18% of the population of Rowan County lives in poverty. Examining the Rowan poverty data by US Census Tract, the deepest levels of poverty in Rowan are clustered close to Salisbury and south-east of Interstate 85 (Figure 10).

Poverty does not affect all races and ethnicities equally. Fourteen percent of Rowan County’s white population is in poverty, compared to 32% of the Black or African American population and 32% of the Hispanic/Latino population, meaning 1 in 3 Black or Hispanic community members are in poverty (US Census Bureau, 2016).

**Black or African-American and Hispanic/Latino residents living in poverty: 32% or 1 in 3**

*“It’s amazing the definition of workforce development has changed over the last few years. Who would have thought problems would be background checks and drugs? Those were the givens back in the day. It used to be you had those. I was looking for the next level of stuff. It’s a different level. It’s almost like babysitting or workforce development, but we have to find a way to work with these people and get them qualified [for work]. Help them understand that this is how you deal with your criminal background and what we can do to help you. ‘This is what you’re going to have to do for your own health to be eligible for a job. This is the work ethic.’ It’s really a frustrating thing. It is something that should take care of itself, but it doesn’t. So, we’re going to have to address it.”*

- Participant, Business Leaders

### HEALTHY NC 2020 OBJECTIVE

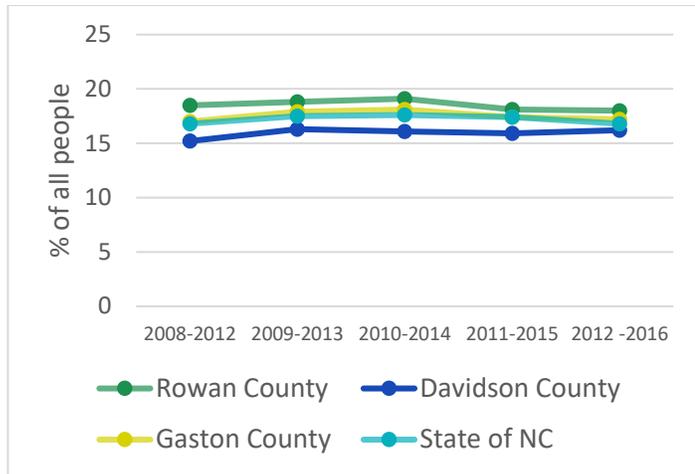

Decrease the percentage of individuals living in poverty.

### FOCUS GROUP FINDINGS

The Business Leaders Focus Group focused on harnessing technology and innovation in industry growth. They also spoke specifically of the need for more workforce readiness, citing jobs they had open but could not find skilled and reliable workers to fill. Substance abuse and the inability to pass a drug test were specifically mentioned as barriers to employment.

Figure 9: Poverty Rate Trend, 2006-2016

Source: US Census Bureau, American FactFinder, American Community Survey, 2010, 2011, 2012, 2013, 2014, 2015, 2016 ACS 5-Year Estimates, Table DP03: Selected Economic Characteristics, County, North Carolina (Counties as listed); <http://factfinder2.census.gov>

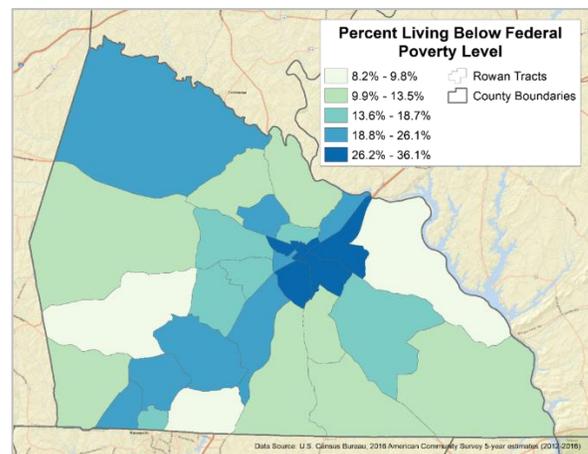

*“I can work. My mind works pretty good. My memory is shot sometimes. Everywhere you go, the thing is that if you're over 55, you're considered seasoned. You're too old. Why? If nothing else, give me a job answering the phone. I can do data entry. So, I have to sit and live off Social Security. I'm 68. I'm not trying to be rich at this age. Let me have some extra so after my little bit of money is gone, I can get up on Tuesday and buy a new dress, and I can do that because I work enough to be able to.”*

- Focus Group Participant, People Living with Disabilities Focus Group

## FOCUS GROUP FINDINGS

The non-profit and government agency leaders focus group identified poverty, language barriers, lack of mental health services, lack of community education on resources and lack of transportation in rural areas as concerns for Rowan County. Specific community health concerns included the opioid epidemic and its impact on children, and chronic diseases due to obesity and lack of physical activity. Recommendations for priorities were jobs with health benefits, affordable health care, chronic disease and healthy lifestyles and preventing and treating childhood trauma.

Figure 10: Percentage of the Population Below Poverty Level, By U.S. Census Tract, 2012-2016

Source: US Census Bureau, American FactFinder, American Community Survey, 2012- 2016 ACS 5-Year Estimates, Table DP03: Selected Economic Characteristics, County, North Carolina (Counties as listed); <http://factfinder2.census.gov>

## Youth and Education

Education prepares children with critical thinking, knowledge and skills they will use throughout their life. Academic achievement can prepare youth for careers and build a ready workforce for a county. Education also impacts health outcomes throughout the lifespan. People with higher levels of education have lower rates of obesity and tobacco use, higher rates of having health insurance and longer life expectancies than their less educated peers.

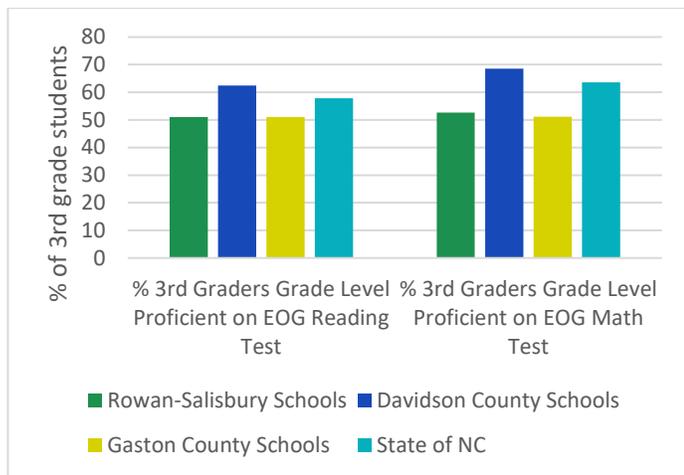

Rowan County has one charter school, 12 private schools, 20 public elementary schools, 7 public middle schools and 7 public high schools (NC Division of Non-Public Education, School Listing by County, as of September 1, 2018, Public Schools of North Carolina; State Board of Education, Department of Public Instruction, Office of Charter Schools, as of August 23, 2018).

Rowan County is home to two colleges, Catawba College and Livingston College. Located in Salisbury, Catawba College offers undergraduate programs, select evening/adult undergraduate programs and one graduate program in STEM Education. The college enrolls 1,325 students from 36 states and 19 countries and provides all students with financial aid. Located in Salisbury, Livingston College is a historically black college which offers 20 bachelors level fields of study. It enrolls 1,200 students on its 272 acre campus.

The Rowan-Cabarrus Community College offers 32 degrees, 30 diplomas and 152 certificate programs. It also supports job trainings throughout the county, and in 2017 was awarded a Golden LEAF grant to address a “skills gap” through training technicians in manufacturing.

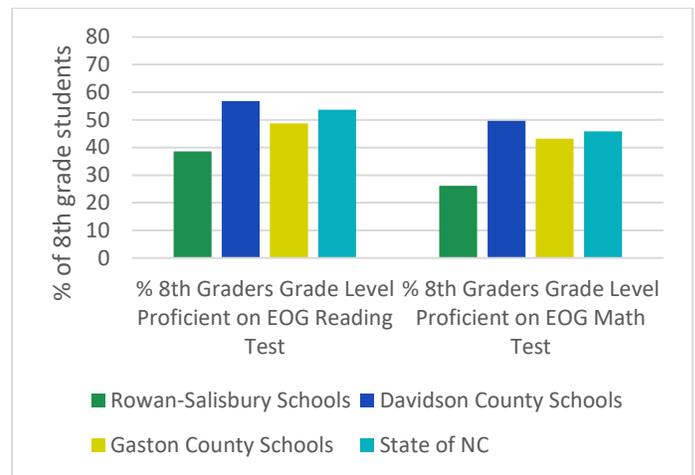

The 2018 Rowan County Community Opinion Survey found that the top challenges for children in school were bullying, stress and mental health, peer pressure and not taking school seriously. Of the households with children, a third reported that their children were doing “excellent” in school, with approximately a quarter each, respectively, reporting their children were doing “very good” or “good”. End of grade test scores in reading and math show that Rowan is underperforming when compared to peer counties and the State (Figures 11, 12).

**Figure 11: 3rd Grade End-of Grade Test Proficiency, 2016-2017**

The U.S. Census Bureau estimates that 83.9% of Rowan County residents have graduated from high school, which is slightly higher than Davidson (82.4%) and Gaston (83.2%), but below the State (86.3%). The Healthy NC 2020 goal is to increase high school graduation to 94.6%. In Rowan County, a higher percentage of female students (86.1%) graduate than male (80.1%) or economically disadvantaged students (78.1%). Average SAT scores are slightly lower but comparable to both peer counties and the State at 1,024. (North Carolina School Report Cards, District Report Card, School Year 2017).

The percentage of residents obtaining a bachelor’s degree is 17.6%, comparable to Davidson (18.2%), but below Gaston (19.8%) and the State (29.0%). The drop-out rate for Rowan County has been steadily rising, and at a faster rate than the peer counties (Figure 13).

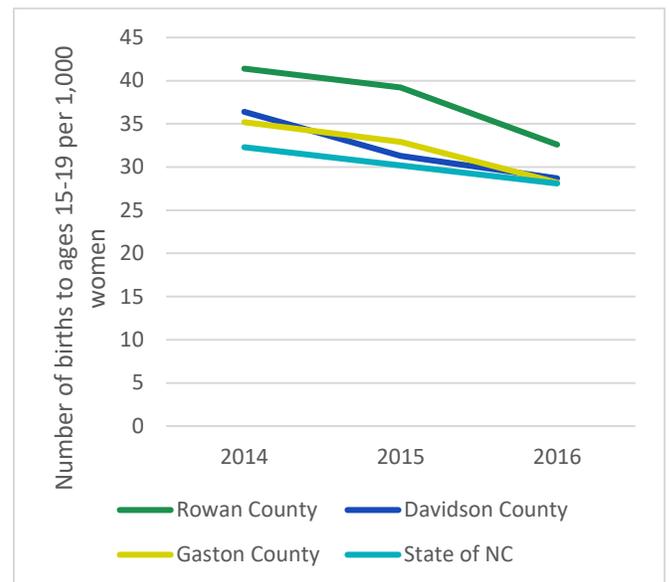

Statewide the trend for teen pregnancies has declined in the last decade from 63.1 to 28.1 (births to ages 15-19 per 1,000 women) between 2006 and 2016. The trend in Rowan County is also a decline, although at 32.6 (births to ages 15-19 per 1,000 women) it remains higher than both the peer counties and the State (Figure 14).

## FOCUS GROUP FINDINGS

The youth focus group identified community strengths including friendliness and the rich history of Rowan County. They believed Rowan was growing, becoming more business friendly, and had a great emphasis on appreciation for the arts and development in downtown Salisbury. Their concerns included the lack of affordable healthy food, social isolation as a byproduct of technology, the lack of resources for education, and performance disparity between high-income and low-income schools. Their priorities were low-cost mental health care, improved infrastructure, and better health care in public schools.

## Youth and Child Welfare

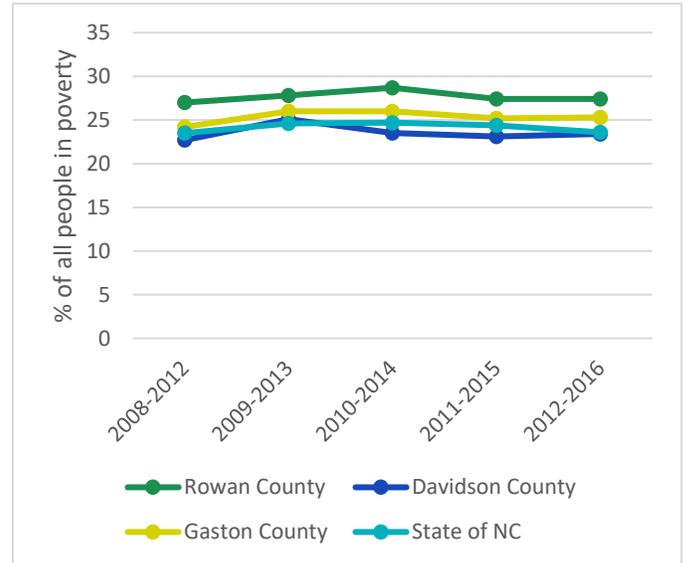

The 2012-2016 American Community Survey estimated that 41.5% of Rowan County households with children are headed by single-parents (Figure 15). Households with children includes households headed by parents, grandparents and other family members. Of the population living in poverty in Rowan County, almost 30% of them are children, slightly higher than both peer counties and the State (Figure 16).

**Figure 15: Composition of Households with Children**

*“From an agency that serves youth, we’re seeing more and more mental health and behavior challenges in young children. Support services are much needed. Pre-K., [issues] even begin that early, so support systems for those kids in traumatic situations are much needed.”*

- Participant, Non-Profit Leaders Focus Group

Child neglect and abuse was ranked the 8<sup>th</sup> most important community concern in the 2018 Community Opinion Survey. Reports of child maltreatment are categorized and placed either on the investigative track or the assessment track. Between 2012 and 2017, a range of 0.28% to 0.48% of the total population of minors in Rowan County had a substantiated neglect and abuse report (Child Welfare, Reports of Abuse and Neglect).

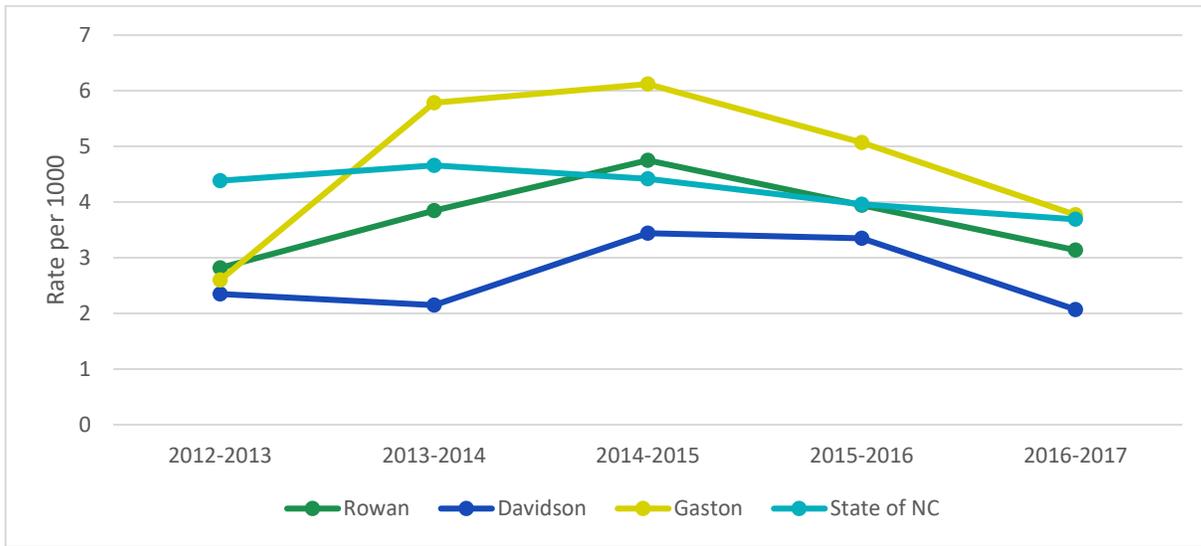

Table 6: Investigated Reports of Abuse and Neglect: Type of Finding/Decision, Number of Children, Rowan County

Category	2012-2013	2013-14	2014-15	2015-16	2016-17
<b>Total No. of Findings of Abuse and Neglect</b>	89	121	149	124	99
<b>No. Substantiated<sup>1</sup> Findings of Abuse and Neglect</b>	1	14	13	8	8
<b>No. Substantiated Findings of Abuse</b>	26	11	9	14	11
<b>No. Substantiated Findings of Neglect</b>	62	96	127	102	80
<b>No. Unsubstantiated Findings</b>	601	482	586	483	448
<b>Services Needed</b>	88	126	152	166	172
<b>Services Recommended</b>	563	1453	1527	1108	758
<b>Services Provided</b>	288	121	9	8	0
<b>Services Not Recommended</b>	1166	425	193	671	946

Source: Child Welfare, Reports of Abuse and Neglect section, Investigated Reports of Abuse and Neglect: Type of Finding/Decision (Exclusive: Most Severe Finding), Number of Children; [http://sasweb.unc.edu/cgi-bin/broker?\\_service=default&\\_program=cweb.tbReport.sas&county=Rowan&label=County&format=html&entry=12&type=CHILD&fn=ALL&vtype=find](http://sasweb.unc.edu/cgi-bin/broker?_service=default&_program=cweb.tbReport.sas&county=Rowan&label=County&format=html&entry=12&type=CHILD&fn=ALL&vtype=find)

The investigative track is where the most severe cases are directed, and it ends in either substantiated or unsubstantiated findings. A substantiated case indicates that the investigation supports a conclusion the subject was abused, neglected, or exploited. Child sexual abuse, severe injury, and criminal neglect all fall into this category. Far more common is the assessment track, which ends in a decision on whether services are needed or recommended and if protective services case plan will be implemented.

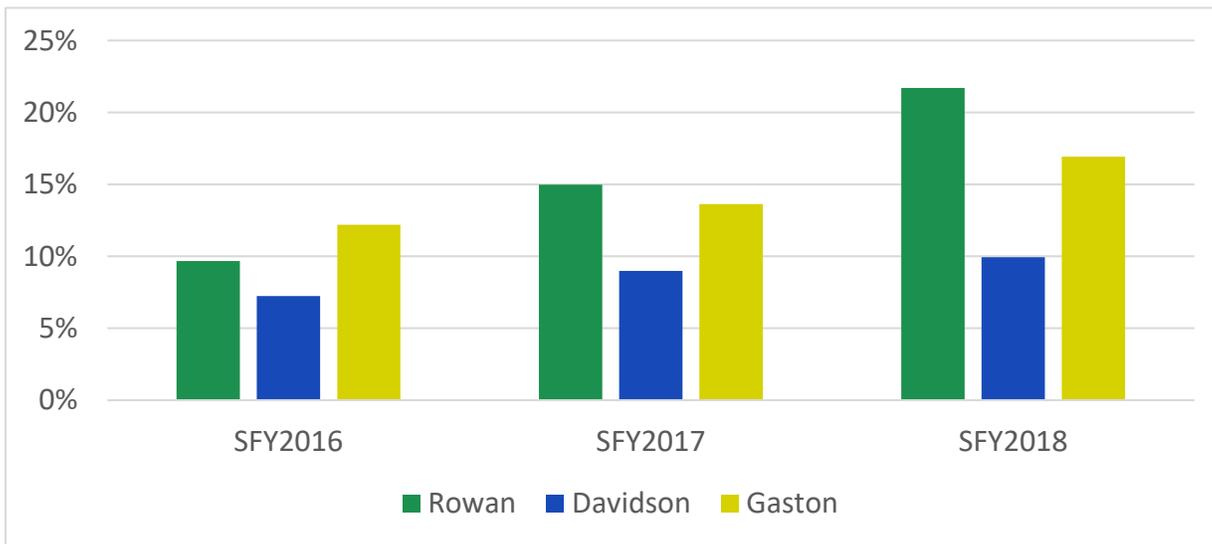

**Figure 17: Rate of Children with Substantiated Abuse and Neglect Reports**

Source: Child Welfare, Reports of Abuse and Neglect section, Investigated Reports of Abuse and Neglect: Type of Finding/Decision (Exclusive: Most Severe Finding), Number of Children

The impact of the opioid epidemic can be seen in the rising percentage of cases where drug abuse was a factor in findings of child maltreatment. Between 2016 and 2018 the percentage of cases has doubled in Rowan County, while increased but at a comparatively lower rate in the peer counties of Davidson and Gaston (Figure 18).

**Figure 18: Percentage of Children with Caretaker Drug Abuse in Findings of Child Maltreatment**

Source: NC Department of Health and Human Services, Client Services Data Warehouse, provided by Rowan County Department of Social Services, 2018.

## Housing and Homelessness

Shelter is a fundamental human need, and substandard housing or a lack of housing can lead to poor social and health outcomes. Living in housing that is overcrowded or inaccessible can severely affect the quality of life for the elderly and people living with developmental or physical disabilities. Additionally, cost of housing can be a financial burden. Lack of available affordable housing units or the requirements for Section 8 housing can be barriers to people obtaining secure shelter. Homelessness puts people at higher risk for infectious and chronic diseases, violence and injury. Vacancy is an indicator of economic decline and can reduce the value of neighboring properties and lead to higher levels of crime.

According to the American Community Survey 5-year estimate, nearly half of all residents in renter occupied units spend more than 30% of their income on housing. The Healthy NC 2020 target is to reduce the percentage of renters spending this amount on housing to 36.1%. Two-third of households in Rowan County own their own unit, and while smaller proportion of homeowners contribute that percentage of their income to a mortgage, nearly a third of all owner-occupied units do (Figures 19, 20, 21). Of Rowan County's estimated 60,472 housing units, 14.9% are vacant (US Census Bureau, 2016).

## HEALTHY NC 2020 OBJECTIVE

**Objective: Decrease the percentage of people spending more than 30% of their income on rental housing.**

**Target: 36.1%**

**Rowan: 46.1%**

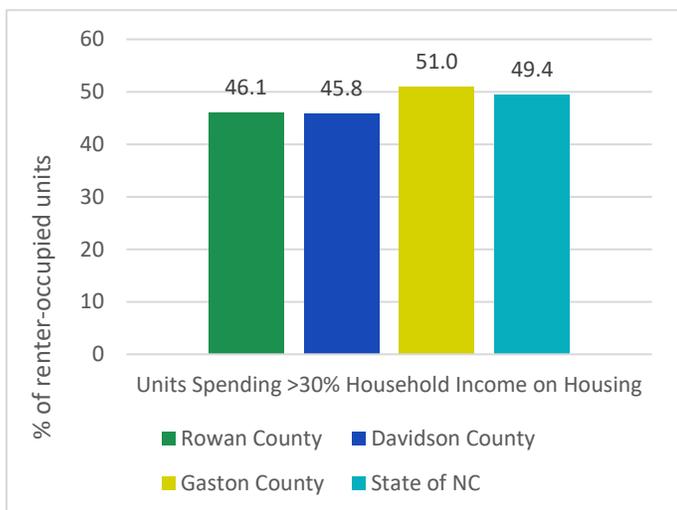

### HOUSING COSTS AND INCOME

<b>Median Mortgage</b>	Rowan County: \$1,054
	NC: \$1,243
<b>Median Rent</b>	Rowan County: \$729
	NC: \$816
<b>Median Household Income</b>	Rowan County: \$52,802
	NC: \$59,667

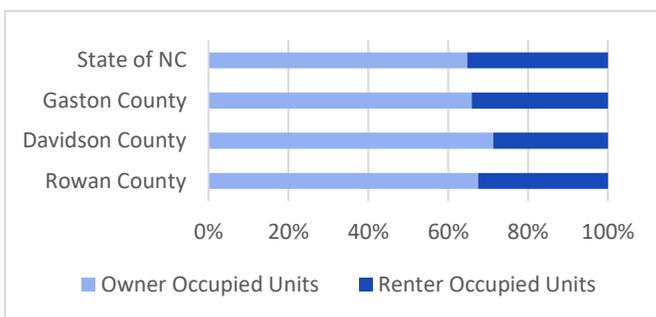

Source: US Census Bureau, American Fact Finder, 2016 ACS 5-Year Estimates, Table DP04: Selected Housing Characteristics

**Figure 20: Renter-Occupied Units Spending >30% of Household Income on Housing, 2012-2016**

**Figure 21: Owner-Occupied Units Spending >30% of Household Income on Housing, 2012-2016**

Source: US Census Bureau, American FactFinder, 2016 ACS 5-Year Estimates, Table DP04: Selected Housing Characteristics (geographies as listed). <http://factfinder2.census.gov>

Each year, a point-in-time homeless population count is conducted. This includes a count of people staying in shelters and people living in campsites, in the woods, or on the streets. At the last count in 2017, there were 168 people experiencing homelessness in Rowan County (Figure 22). This type of count is imperfect, and it is assumed that some were missed in the count because they could not be found, therefore the number of people experiencing homelessness is likely higher.

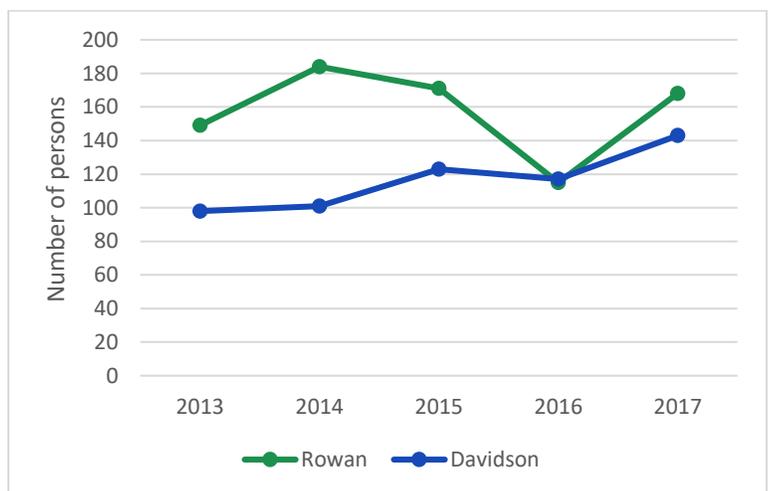

Rowan Helping Ministries is the only shelter serving the county. It provides temporary shelter for 65-70 guests each night, noon meals for 150-180 each day and skill building programs and classes around topics such as life coaching, work skills and financial management. Its main location is in Salisbury, with a satellite location offering services in West Rowan. Main Street Mission serves a similar role as Rowan Helping Ministries for the China Grove area of Rowan County, but it is not a shelter.

Homelessness was ranked 5<sup>th</sup> in the list of top community issues by respondents to the 2018 Community Opinion Survey. A focus group was also conducted with people experiencing homelessness, and participants' discussion identified many barriers to services. These challenges included not being able to qualify for housing or medical assistance because of criminal records or because they did not meet qualification requirements, difficulty obtaining employment because of lack of transportation to a job or because of felony conviction and instability caused by the time-limits placed on staying in the shelter.

*"If I was in the position to do anything to help somebody, I would get all these companies jobs to try to ... if they're employing felons, I would give them a tax write off. Everyone they hire, they get a tax write off. That would create jobs. I'm quite sure if they were to get a tax write off for a hundred thousand, they would do it. I wouldn't give people money because you might give it to the wrong person. The companies hiring you are going to benefit and you're getting a paycheck. Everyone would benefit."*

- Participant, People Experiencing Homelessness Focus Group

Figure 22: Point-in-Time Homeless Population Count

Source: North Carolina Coalition to End Homelessness, Point-in-Time Map: Numbers of Homeless Persons by County, <http://www.ncceh.org/pitdata/>

Note: Data not available for Gaston County

## Crime

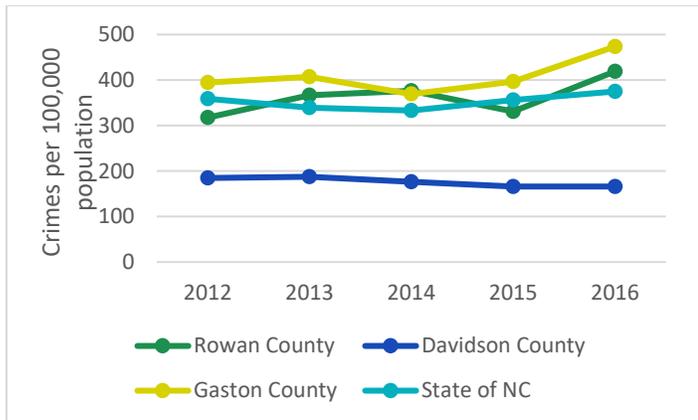

Violent crime can lead to severe injury, trauma and mental health issues, or fatality. The chronic stress of living in an unsafe environment can contribute to anxiety and depression, accelerating aging and harming overall health. Fear of violence can also erode community trust and cohesion and make neighbors distrustful of each other.

Violent crime was ranked the 9<sup>th</sup> highest in top community concerns in the Community Opinion Survey, a perception that was also reflected in 6 of the 7 focus groups. Concern with violent crime included gun violence, drug use, elder abuse, and school shootings.

Despite the concern of crime, the 2018 Community Opinion Survey found that 89.3% of survey respondents indicated that they feel safe in their own neighborhood. Seventy-two percent of survey respondents indicated that if they were a victim of a crime they have confidence that the police department would be able to solve the crime. Only 9.1% reported being a victim of a crime, and of these a third of the crimes were theft.

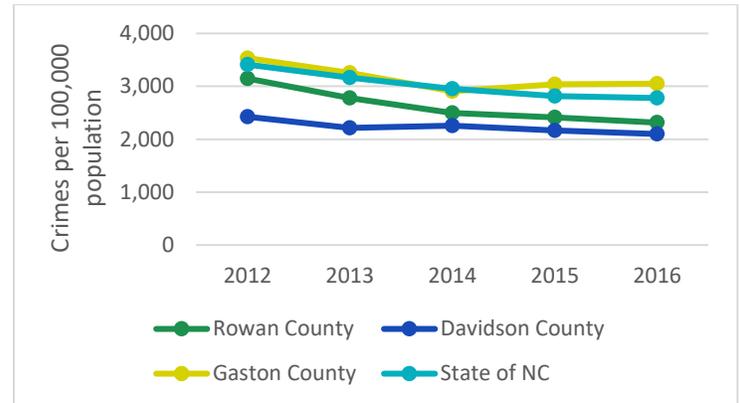

In 2016, violent crime accounted for 15.3% while property crime accounted for 84.7% of index crimes in Rowan County. The rate of violent crime is rising, while in contrast the rate of rate of property crimes is trending downward since 2012 (Figure 23, 24).

**Figure 23: Violent Crime Rates**

Source: NC Department of Justice, State Bureau of Investigation, Crime, View Crime Statistics, Crime Statistics (by Year). County Rates: <http://crimereporting.ncsbi.gov/>

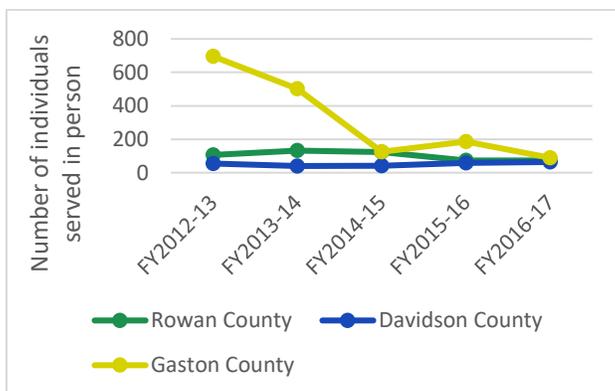

**Figure 24: Property Crime Rates**

The number of clients served for complaints of sexual assault and domestic violence are taken from reports from each state-funded domestic violence and sexual assault grantee. Rowan’s number of clients seeking services for sexual assault has remained steadily above Davidson and below Gaston County (Figure 25). The number of clients seeking services for domestic violence exceeded both peer counties significantly from 2012-2015 but have declined from 2016-2017 (Figure 26).

## Transportation

Rowan County has three public transportation systems: the Rowan Transit System, the Salisbury Transit System, and the CK Rider. Both the Rowan Transit System and the Salisbury Transit System offer set routes and demand response transportation. The Rowan Transit System’s demand response route, the Rowan Individual Transportation Assistance (RITA), is available one day per week for each of the four areas of the county. Rides must be arranged in advance. The majority of ridership on the Salisbury Transit system is fixed route, whereas 80% of the 90,514 rides on Rowan Transit were demand-response rides in 2017 (Figure 28). The CK Rider serves the Rowan part of Kannapolis.

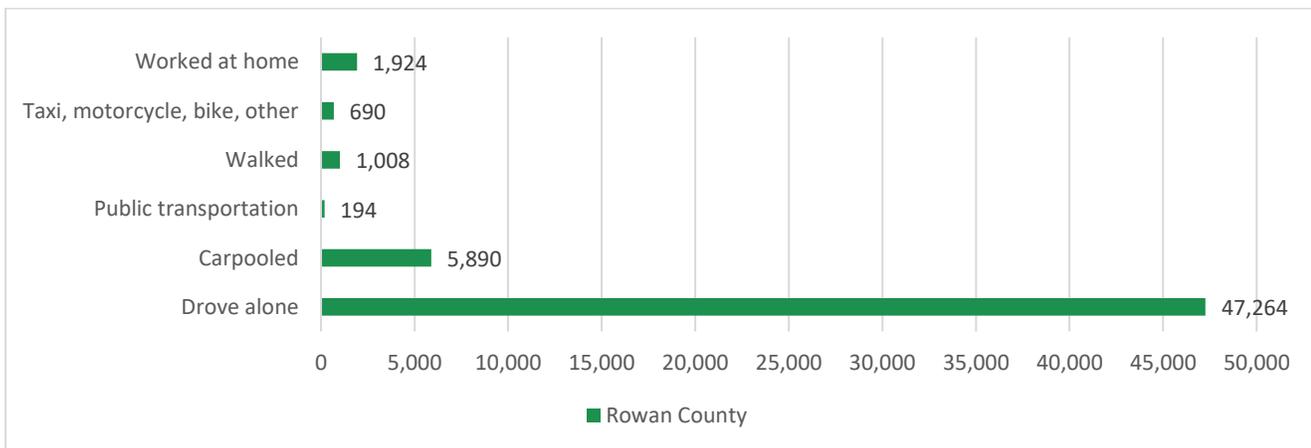

Four out of five Rowan residents drive their personal vehicle to work, according to US Census Estimates (Figure 27). An estimated 6.2% of households do not have access to a personal vehicle (US Census Bureau, 2016).

Focus group respondents, specifically members of the groups experiencing homelessness and living with disabilities, expressed concerns that the public transportation does not adequately serve them. Concerns included that it does not reach rural areas, and that restrictions around when the RITA bus is available and how it must be scheduled are barriers for them to use it in a way that meets their needs.

*“My problem with transportation is they take me to the doctor’s appointments. If I call them within 3 days, they’ll get me there. If it’s across a county line, I have to do 5 days in advance. Charlotte, it’s only between certain times. I kind of understand that because of the traffic. ...I signed up for a diabetic class. They wouldn’t take me. They said the class was free [but] Medicaid wouldn’t pay for the transportation. I [went] to a different doctor. I then have to have that doctor fill out papers to Medicaid to agree to pay. Then I can go. I accept that because I figure that’s the procedure. But right now, Rowan Transit told me they wouldn’t sign me up because of where I live. They said the city bus goes right past the mall. I know that’s not true. I’ve seen them get other people. Their reason for not taking me is because I live right at the bus route. So what? Where the bus goes might not be where I need to be.”*

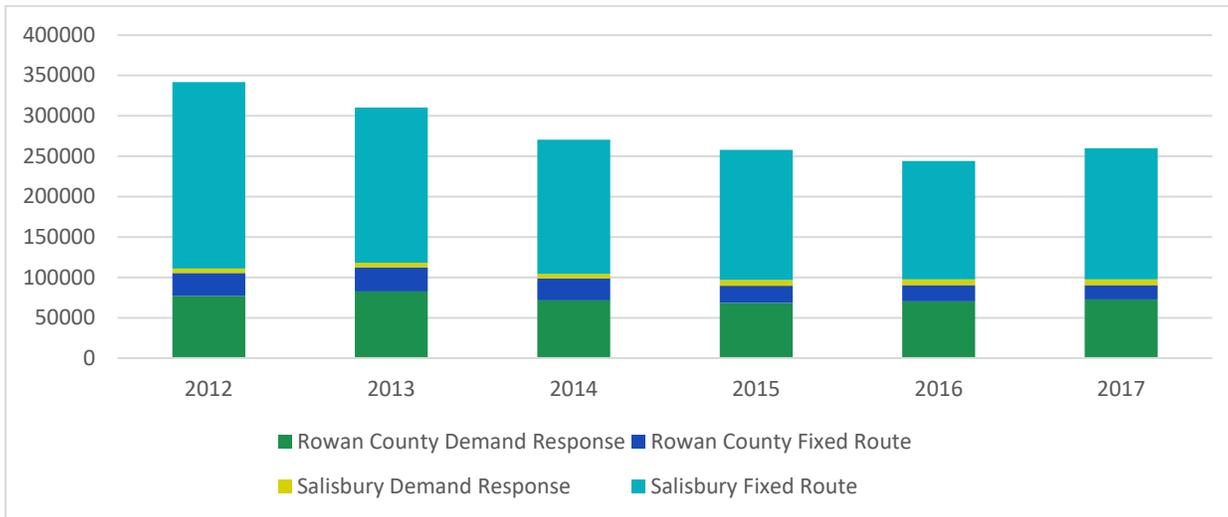

- Participant, People Living with Disabilities Focus Group

Figure 27: Mode of Transportation to Work

Source: US Census Bureau, American FactFinder, 2012-2016 American Community Survey 5-Year Estimates, Table B08006: Sex of Workers by Means of Transportation to Work. County, North Carolina

Figure 28: Public Transportation Total Trips

Source: NC State University Institute for Transportation and Research, NCDOT, and NCTracks, 2012-2017.

“I’m concerned about our seniors. I am a senior too, but [I’m concerned about] the ones that’s not able to drive. Thank God I’m still able to drive. There are certain days the RITA van picks them up. When I stop driving, I want to be able to come here more than once or twice a day, and [to be able to come] for the meal site, too. I would like to see the RITA van come out in the country. I live out in the country. I would like to see the van come out and pick up our seniors more. There’s a lot of elderly people that don’t know about Rufty Holmes or the meal site.

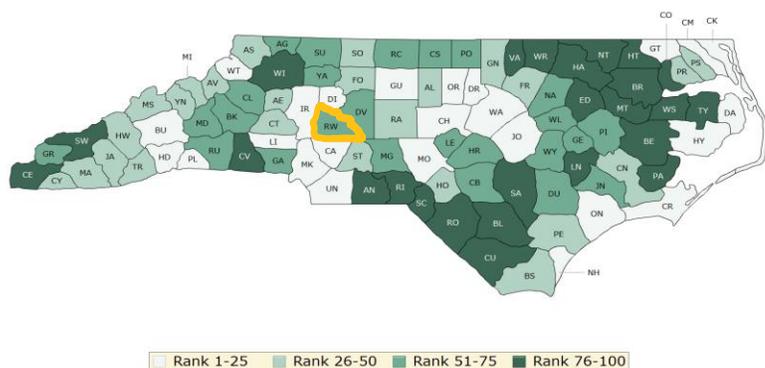

- Focus Group Participant, Elderly Focus Group

## Health Indicators

### County Health Rankings

Each year, the County Health Rankings and Roadmap program releases its findings on comparative indicators in health factors and health outcomes within each state. This program is a collaboration between the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institute. In 2018, of the 100 counties in North Carolina, Rowan ranked 62<sup>nd</sup> in health outcomes and 67<sup>th</sup> in health factors. In comparison, Davidson ranked 64<sup>th</sup> and 53<sup>rd</sup> and Gaston ranked 67<sup>th</sup> and 52<sup>nd</sup>, respectively. Rowan County was ranked in the third quartile, where 1 is the best and 100 is the worst.

Figure 29: North Carolina County Health Rankings by Health Factors by Quartile

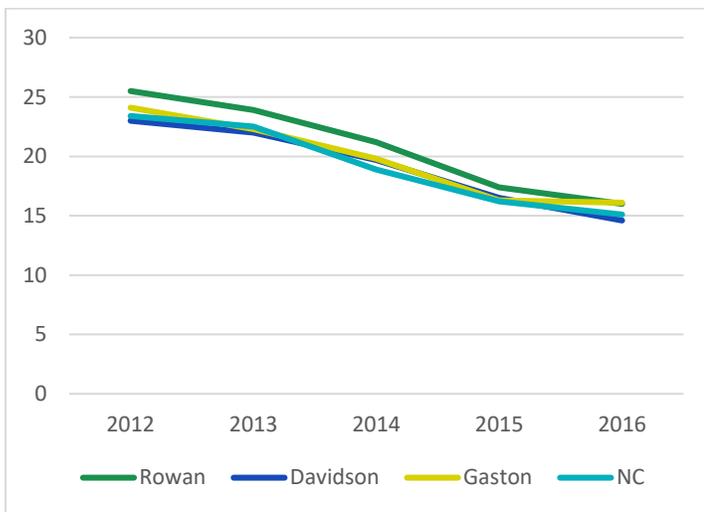

## Access to Health Care

Thirteen percent of residents reported trouble accessing health care in the 2018 Community Opinion Survey. Of those, 38.5% identified lack of health insurance as the barrier to service, 23.1% cited insufficient insurance, 11.5% cited the cost of the co-pay or deductible as too high, and 11.5% cited the lack of providers. As of 2016, 16.4% or approximately 13,000 of non-elderly adults are uninsured in Rowan County. The Healthy NC 2020 target is 8%. The percentage of uninsured non-elderly is on a downward trend in Rowan County and statewide (Figure 30).

Most children in Rowan County have insurance, but 1,387 children (or 4.3%) do not. This percentage is slightly lower than that of the State (4.7%) (Figure 31).

Figure 30: Uninsured Adults Age 18-64

### FOCUS GROUP FINDINGS

Non-profit focus group participants identified providing affordable insurance, increasing the number of free clinics, reducing language barriers to care and reducing eligibility barriers as areas for improvement in health care access. They specifically noted instances where a household budget could not afford health insurance, or where it was included to the detriment of other household budget line items.

“In the older adult program, we see this. There is a program called extra help for Social Security. They’re spending all their money on medications. They make just enough not to qualify, but then they’re broke at the end of the month.”

-Participant, Non-Profit Leaders Group

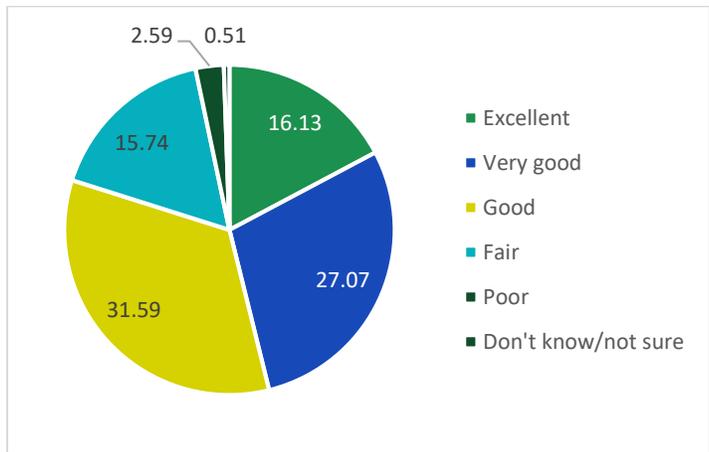

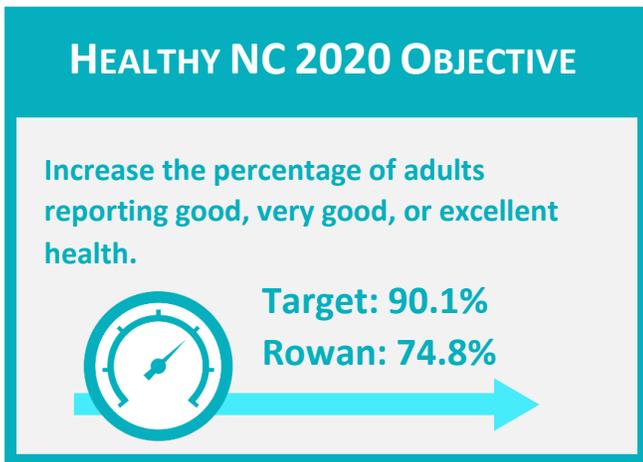

There are two free or community-based clinics in Rowan County: Community Care Clinic of Rowan County and Good Shepherds Clinic. China Grove Family Medicine and Northern Rowan Family Medicine are not free but do accept a sliding scale and are federally-qualified health clinics that receiving funding to cover services.

*“And health insurance is so ... I know that’s maybe something that maybe Rowan County can’t change, but it is so expensive. My husband, just for me alone would pay \$480 a month. If he made maybe \$20,000 a month, it would be great, but who can afford something like that? I think the health situation is not a good one for most who can’t afford health insurance.”*

- Participant, Latinx Focus Group

## Overall Health

Figure 32: Self-reported general health

Source: Rowan County Health and Human Service Needs Assessment, 2018

When asked to assess their overall health, three quarters of Rowan County residents surveyed in the 2018 Community Opinion Survey reported they were in good, very good, or excellent health (Figure 32). The Healthy NC 2020 target is 90.1%.

## Leading Causes of Death

Cancer, heart disease, and chronic lower respiratory disease are consistent across the State and peer counties as the top three leading causes of death. Rowan County has the highest rates of cancer, all other unintentional injuries, pneumonia and influenza, and nephritis, nephrotic syndrome and nephrosis (kidney disease) rates when compared to the peer counties and the State (Table 7). Red lettering in Table 7 indicates a rate for Rowan County that is higher than the rate for the State. The rates for Rowan County are higher than the State rates for all but causes of death, prostate and breast cancer.

Table 7: Leading Causes of Death

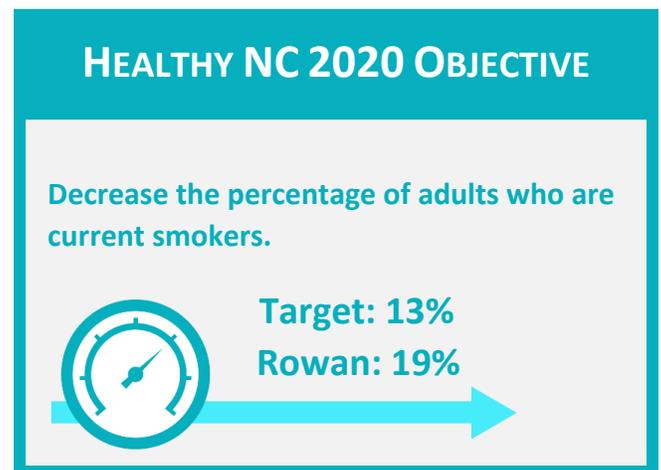

Rank/Cause of Death	Rowan County		Davidson County		Gaston County		State of NC	
	Number	Rate*	Number	Rate*	Number	Rate*	Number	Rate*
<b>1. Cancer</b>	1,696	194.6	1,915	182.3	2,334	186.7	95,163	166.5
<b>Trachea, Bronchus, and Lung</b>	513	57.5	658	61.2	785	61.1	27,615	47.5

 Red text indicates where the rate for Rowan County is higher than for the State.

## Health Behavior

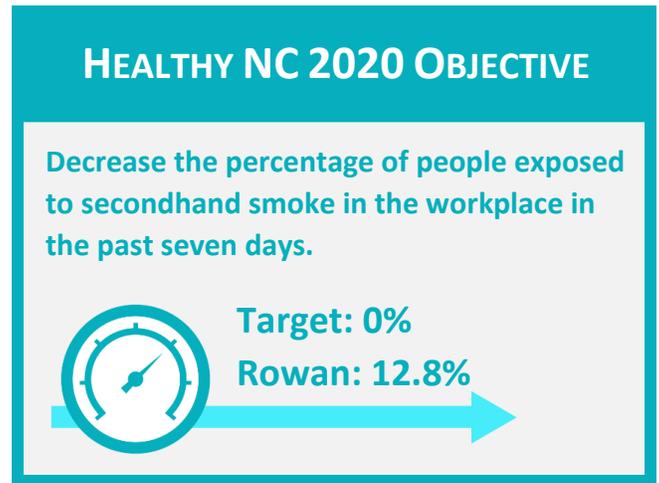

Healthy behaviors, including getting appropriate nutrition and exercise and avoiding smoking, can reduce the risk of developing health conditions like type 2 diabetes, high blood pressure, heart disease, kidney disease and stroke.

In the Community Opinion Survey, over half (53.9%) of Rowan County residents reported that they meet the CDC’s Aerobic Recommendation of getting 150 minutes per week of moderate activity, or 75 minutes per week of vigorous exercise, or an equivalent combination of the two. The Healthy NC 2020 target

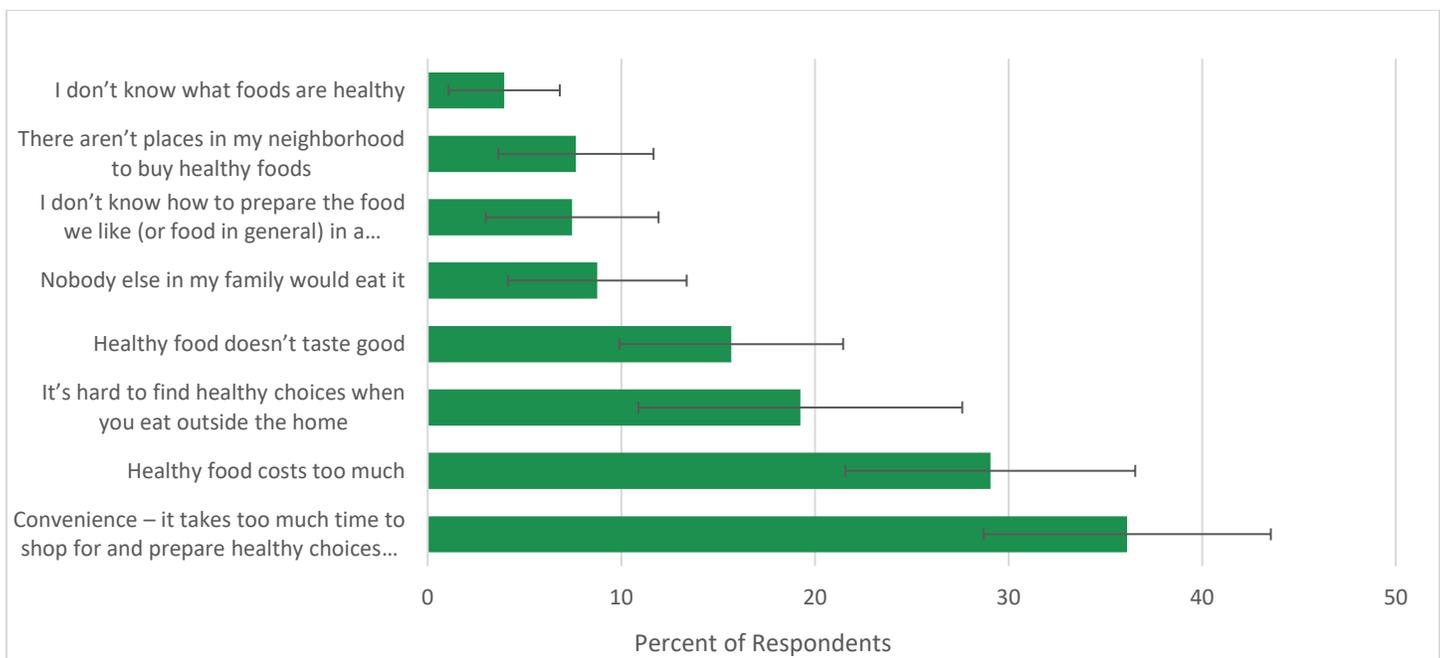

is to increase this to 60.6%. Most people reported exercising at home, with neighborhood, work, and a private gym or pool being the other top locations for physical activity. Time, cost, physical disability and dislike of exercise were all cited as barriers to getting more physical activity in the 2018 Community Opinion Survey.

According to the 2018 County Health Rankings and Roadmaps, 19% of adults in Rowan County smoke cigarettes. In the Community Opinion Survey, most (64.6%) residents reported they support a tobacco-free policy for the county, 25.4% did not, and 8.3% were not sure. A quarter (25.3%) reported that they smoke cigarettes or use tobacco products, including JUULS, regularly. Twelve percent reported being exposed to second-hand smoke at work. The Healthy NC 2020 target is to eliminate workplace exposure.

Over half of residents reported that they had been to the Salisbury-Rowan Farmer’s Market. Survey respondents reported that convenience (36.1%) and cost (29.1%) were their two largest barriers to eating a healthy diet. The 2018 Community Opinion Survey found that 9.8% respondents have cut or skipped meals or sought reduced cost community meals because there wasn’t enough money for food.

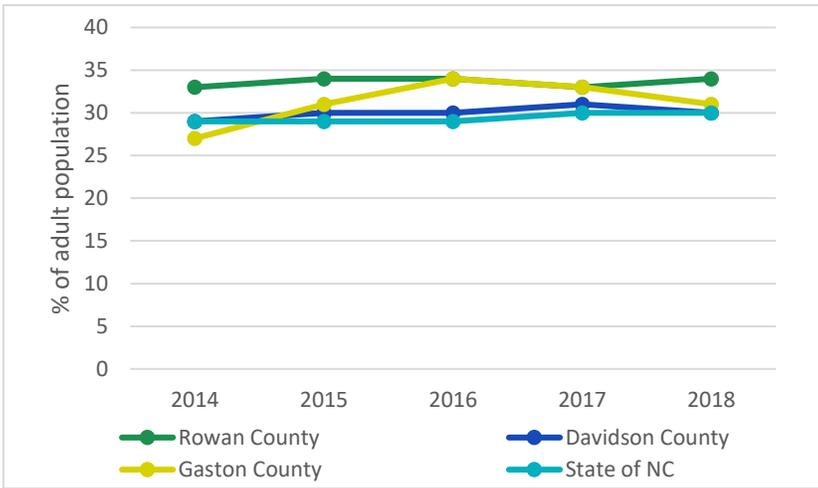

**Figure 32: Responses on reasons for consuming unhealthy nutrition**

Source: Rowan County Community Opinion Survey, 2018

In the absence of county-level reported estimations, modeled data estimates for adult obesity were taken from the County Health Rankings and Roadmaps developed by the University of Wisconsin and the Robert Wood Johnson Foundation. It shows Rowan County steadily maintaining around 30% of the adult population measuring as obese, just under the State estimates and on par with Davidson County. Due to the modeled nature of the data, however, caution should be taken when making comparisons between counties as there could be differences not accounted for in the model (Figure 33).

**Figure 33: Estimated Adult Obesity\***

Source: County Health Rankings and Roadmaps, North Carolina, 2014-2018;  
<http://www.countyhealthrankings.org/>

\*The data source for adult obesity is the Behavioral Risk Factor Surveillance System (BRFSS), conducted on an annual basis throughout counties in North Carolina. State and regional results are published by the NC State Center for Health Statistics, but county-level data are suppressed due to small numbers of respondents and a high degree of uncertainty. The County Health Rankings, however, publishes county-level estimates for adult obesity using statistical model-based estimates that may not accurately reflect local-level variation, and caution should be used when making comparisons between NC counties.

In the absence of county-level reported estimations of childhood obesity, de-duplicated BMI and percentile data was used from Salisbury Pediatrics. Based on the child population of Rowan County, it is estimated that Salisbury Pediatrics sees 36% of the total children in the county. Of these, 39.1% of children 0-18 years with a measured BMI seen at Salisbury Pediatrics are overweight (16.6%) or obese (22.5%)(Figure 34). When compared to the state obesity prevalence published by the Youth Risk Behavior Surveillance Survey, 15.4% of NC high school students are obese (Figure 35). Salisbury Pediatrics data shows that 28.4% of high school age children are obese, nearly double the State estimate.

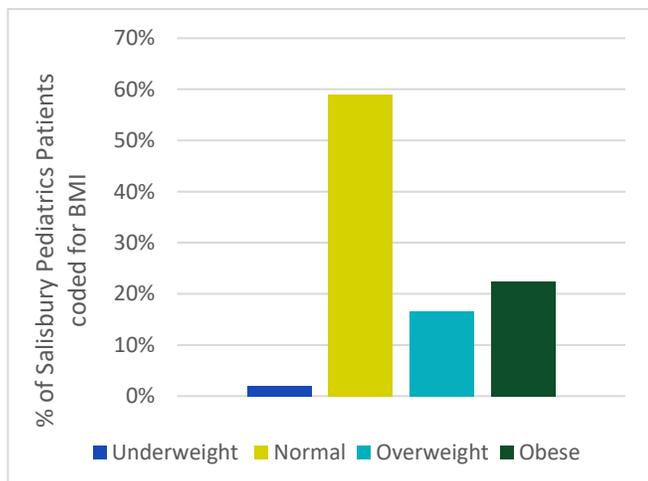

## HEALTHY NC 2020 OBJECTIVE

Increase the percentage of high school students that are neither overweight nor obese.

Target: 79.2%

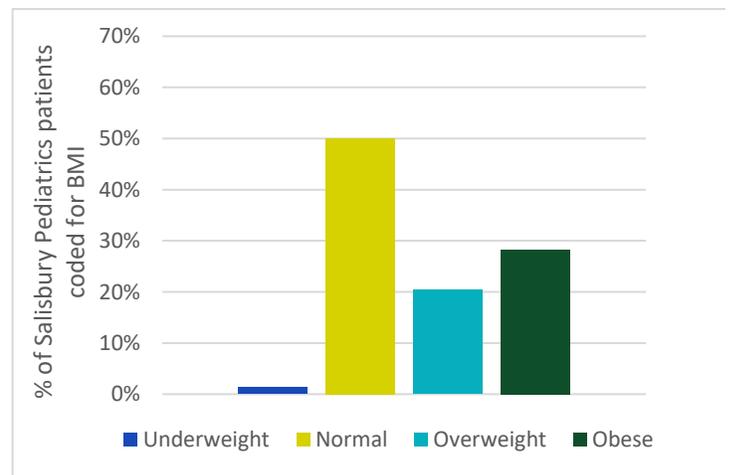

Rowan: 51.3%

**Figure 34: Childhood Obesity Data from Salisbury Pediatrics**

## Chronic Disease

Chronic diseases, defined as conditions that last one year or more, are among the most common, costly, and preventable health problems in the United States. Lifestyle risk factors including nutrition, physical activity, tobacco use, and excessive alcohol consumption all contribute to these diseases

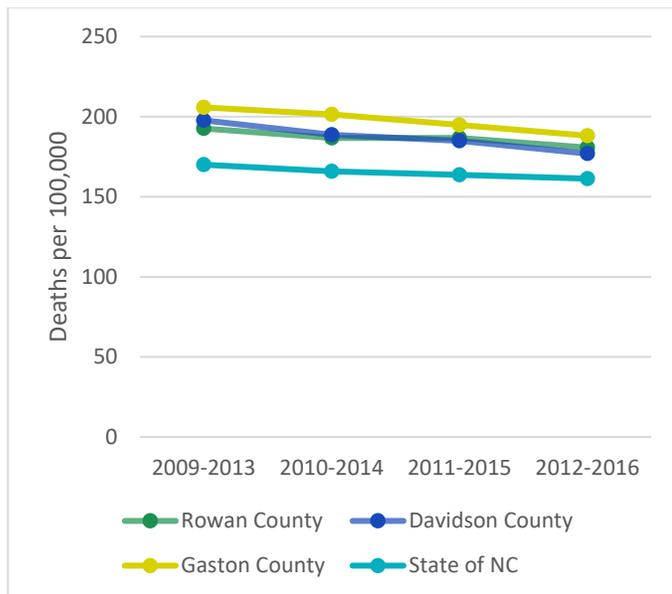

### Heart Disease

Heart disease is the second leading cause of death in Rowan County. The rate of mortality was 180.7 per 1,000 deaths in 2016, very close to Davidson County (176.9 per 1,000 deaths) but above the State (161.3 per 1,000 deaths). The rate of heart disease mortality has been trending downward (Figure 36).

### Diabetes

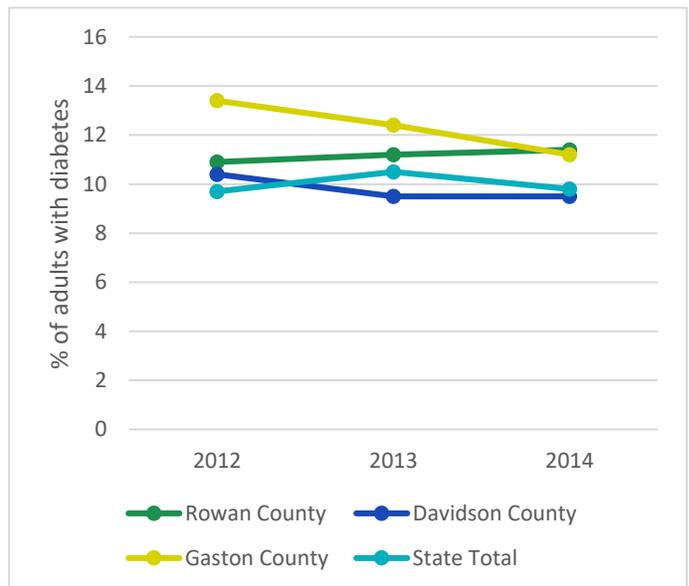

Diabetes is the seventh leading cause of death in Rowan County. The latest CDC reported percentage was 11.4, exceeding both peer counties of Davidson (9.5%) and Gaston (11.2%) as well as the State (9.8%), and also shows a slight upward trend for Rowan County (Figure 37). The 2018 Community Opinion Survey found that 20.6% of the sample reported a diagnosis of diabetes.

Figure 36: Heart Disease Mortality Rates

Source: Centers for Disease Control and Prevention, Diabetes Data and Trends, County Data and State Data. Maps and Data Tables: Indicator, location and year as listed above. <http://www.cdc.gov/diabetes/atlas/countydata/atlas.html>

### Stroke

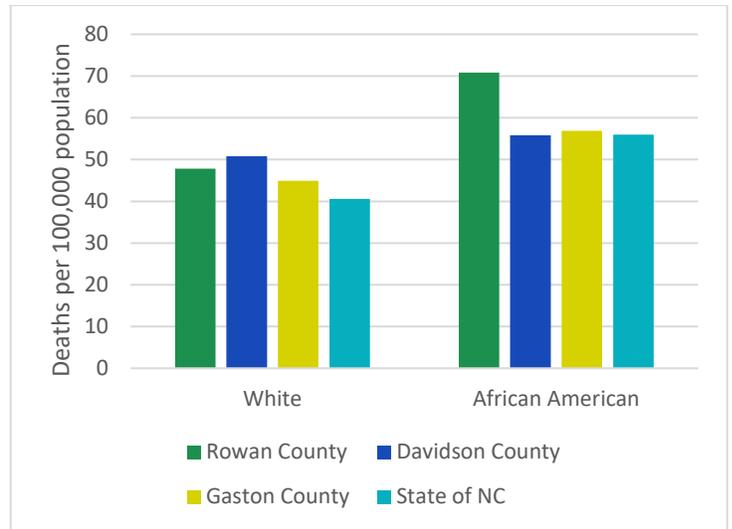

The rate of death by stroke in Rowan County is 49.5 per 100,000 (Figure 38). This is below Davidson County (51.1), but above both Gaston County (45.7) and the State (43.1). Death by stroke affects white and African American member of the community disproportionately, with the African American stroke mortality rate at 70.8 per 100,000 deaths far exceeding the white rate of 47.8 per 100,000 deaths. The same degree of disparity does not exist in the peer counties or the State (Figure 39).

**Figure 38: Stroke Mortality Rate**

## Asthma

The 2018 Community Opinion Survey found that 10.6% of residents reported a diagnosis of asthma.

## Alzheimer's Disease

With a mortality rate of 36.0 deaths per 1000,000 population, Rowan County is slightly above the State (31.9 per 100,000), but below the peer counties of Davison (39.6 per 100,000) and Gaston (50.2 per 100,000) in Alzheimer's related deaths (Figure 40).

**Figure 40: Alzheimer's Disease Mortality Rate**

Source: NC State Center for Health Statistics, Statistics and Reports, Vital Statistics, NC Vital Statistics Volume II: Leading Causes of Death, 2009 through 2016; <http://www.schs.state.nc.us/data/vital.cfm#vitalvol2>

## Communicable and Vaccine-Preventable Diseases

The NC Division of Public Health maintains a database of reportable diseases that occur statewide, and case investigation and follow-up is conducted by local health departments as necessary. Selected communicable and vaccine-preventable diseases are shown in the table below. The majority of reportable diseases in Rowan County are enteric diseases such as

Campylobacter and Salmonellosis, followed by Hepatitis (acute and chronic Hepatitis B), and vaccine preventable diseases (Pertussis, Haemophilus influenza, and influenza).

**Table 8: Reportable Disease Case Counts for Rowan County, 2013-2017**

Reportable Disease	Disease Group	Cases Per Year				
		2013	2014	2015	2016	2017
Campylobacter infection (intestinal bacterial infection)	Enteric	16	31	12	11	20

## Mental Health

Mental health includes emotional, psychological, and social well-being. It affects how we function, what choices we make, and how we interact with others. Mental health and mental illness are related, yet distinct. A person could be experiencing a poor mental health day, where they feel sad or anxious, but not have a mental illness. Mental health can also change over time, and at different points in a person’s life. Chronic mental illness, especially depression, can put someone at heightened risk for stroke, type 2 diabetes, and heart disease.

In the 2018 Community Opinion Survey, residents reported an average of 2.9 days per month when their mental health was “not good.” The Healthy NC 2020 target is 2.8. The responses ranged from 0 days to more than 20 days, with 13.8% reporting more than 20 days in the past 30 that their mental health was not good. Approximately 1 in 5 residents surveyed reported a diagnosis of anxiety or depression.

The 2016 suicide rate in Rowan County was 18.2 per 100,000, more than double the Healthy NC 2020 target of 8.3. Rates of death by suicide is also rising more quickly in Rowan County than in Davidson and Gaston counties, which also have shown increased rates. The rate for the State has only risen slightly (Figure 41). Across Rowan, the peer counties, and the State, suicide is the third leading cause of death among ages 20-39 (NC Center for Health Statistics). Rates of suicide mortality in Rowan County are higher in males (27.1 per 100,000) than females (9.9 per 100,000).

HEALTHY NC 2020 OBJECTIVE

Reduce the suicide rate (per 100,000 population).

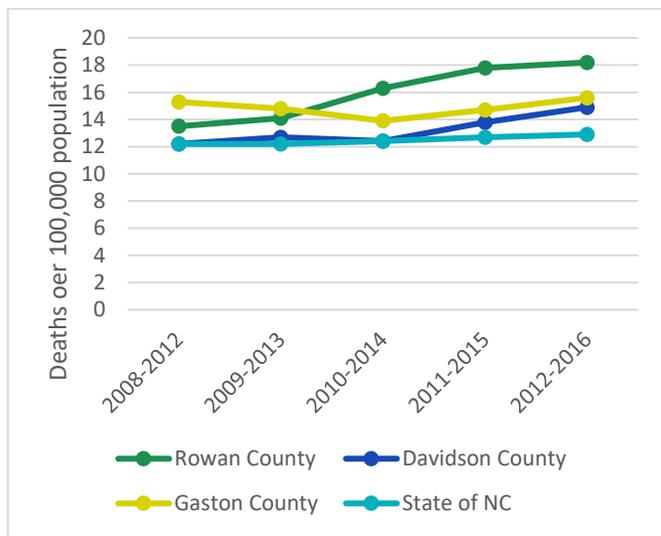

Target: 8.3

Rowan: 18.2

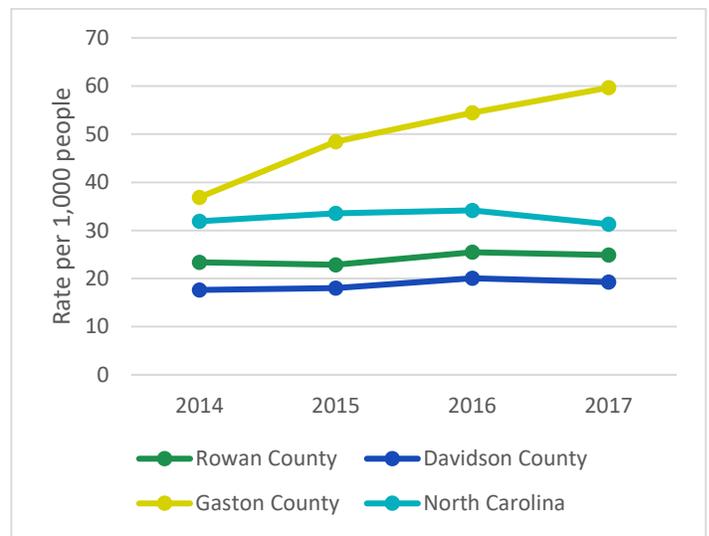

The rate of persons served by the local management entity LME-MCO, Cardinal Innovations Healthcare Solutions, has remained nearly flat from 2014 to 2017 (Figure 42).

**Figure 41: Suicide Mortality Rate Trend**

## Unintentional Injury

Unintentional injury mortality includes motor vehicle crashes, falls, fires and burns, drowning, poisoning and aspirations. It is the 5<sup>th</sup> leading cause of death in Rowan County. Rowan County has a higher rate than both peer counties and the State (Figure 43).

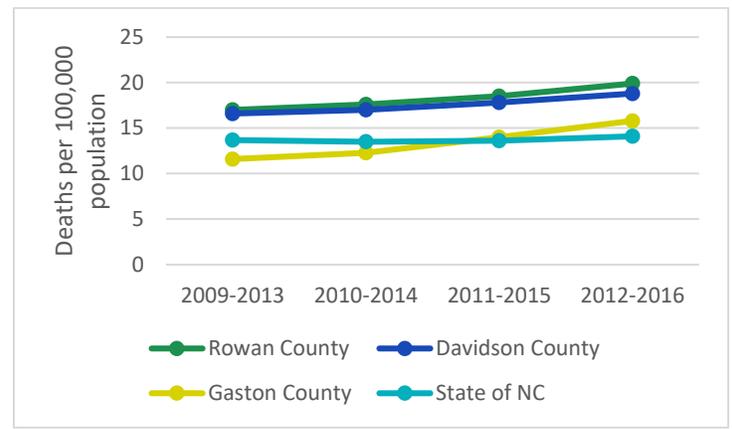

Death by motor vehicle injury is the tenth leading cause of death in Rowan County. At 19.9 deaths per 100,000, Rowan County has the highest rate among Davidson (18.8 per 100,000), Gaston (15.8 per 100,000), and the State (14.1 per 100,000). All three counties and the State have an upward trend, indicating a rise in motor vehicle mortality (Figure 44).

### Substance Use Disorders

Addiction to drugs or alcohol is a chronic health condition, and those who suffer from it are at risk for early death, certain diseases, injury and disability. Misuse of prescription painkillers and use of heroin and opiates have increased dramatically nationwide. Substance abuse can contribute to family instability, loss of employment, child neglect or maltreatment, poverty, involvement in the criminal justice system, and violence.

Illicit drug use, medication misuse, and alcohol abuse were identified as the #1, #3, #7 top community issues in the 2018 Community Opinion Survey, respectively. One in 5 respondents reported that a friend or family member had been affected by the use of prescription painkillers such as opioids or heroin. Of those, 42.5% indicated that they did not seek treatment.

**Figure 44: Map of Regions, NCALHD**

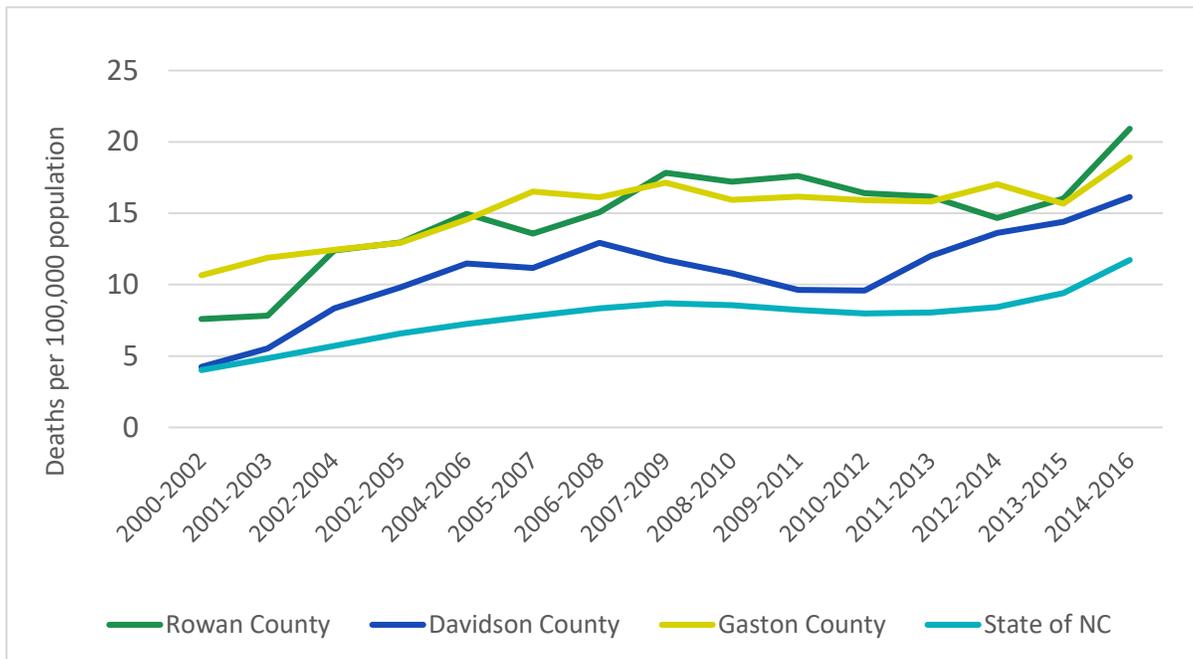

The newborn drug withdrawal hospitalization rate of 13.6 hospitalizations per 1,000 live births is higher than the Region 4 rate (6.7 per 1,000) and state (9.0 per 1,000). Region 4 is a part of a regional designation by the North Carolina Association of Local Health Directors (NCALHD), and consists of Alexander, Cabarrus, Catawba, Cleveland, Gaston, Iredell, Lincoln, Mecklenburg, Stanly, and Union counties in addition to Rowan.

Image Source: North Carolina Association of Local Health Directors, Map of Regions

Opiates include opium, heroin, methadone, and other synthetic opioids. The rate of opiate poisoning mortality is rising in both peer counties, and all three are above the State rate (Figure 46). While commonly prescribed opioid medications have been the leading substance contributing to the mortality rate, use of synthetic narcotics and heroin are rising in Rowan County (Figure 47).

According to SAMHSA’s Behavioral Health Treatment Services Locator (<https://findtreatment.samhsa.gov/>), there are four operating substance abuse and opioid treatment programs in Rowan County. They are Treatment Centers LLC, Daymark Recovery Services Rowan Center, Genesis A New Beginning, and the Veterans Affairs Medical Center.

**Rowan County Residents, 1999-2016**

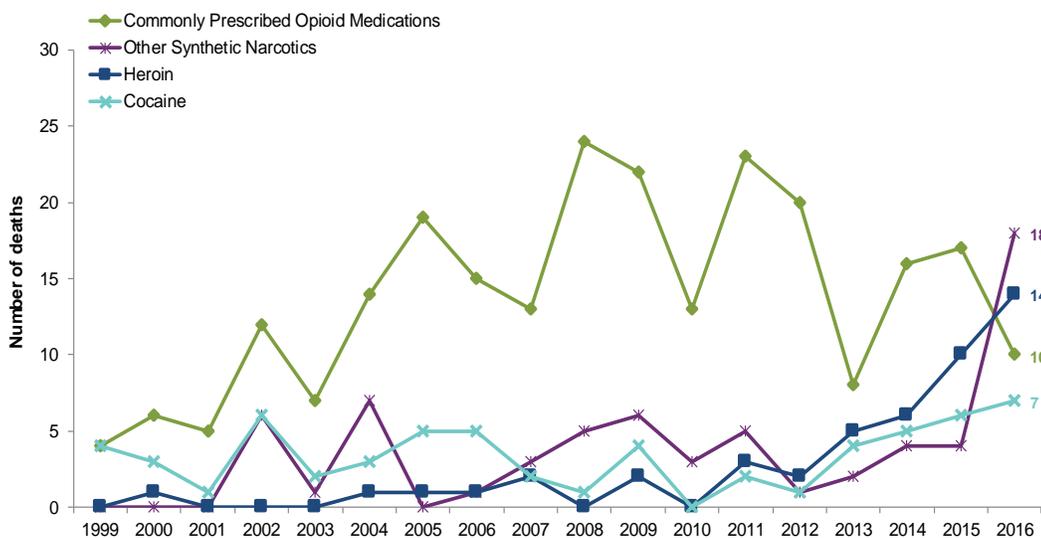

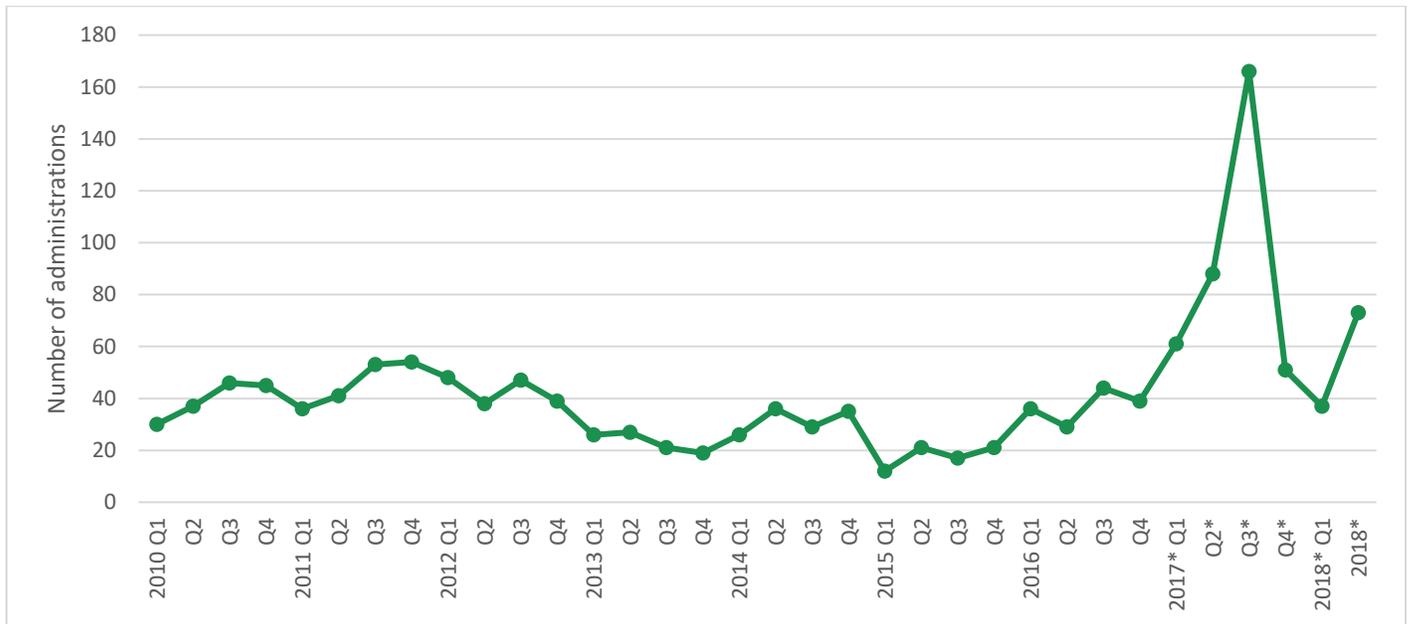

Image and Data Source: N.C. State Center for Health Statistics, Vital Statistics-Deaths, 1999-2016, Unintentional medication and drug overdose: X40-X44

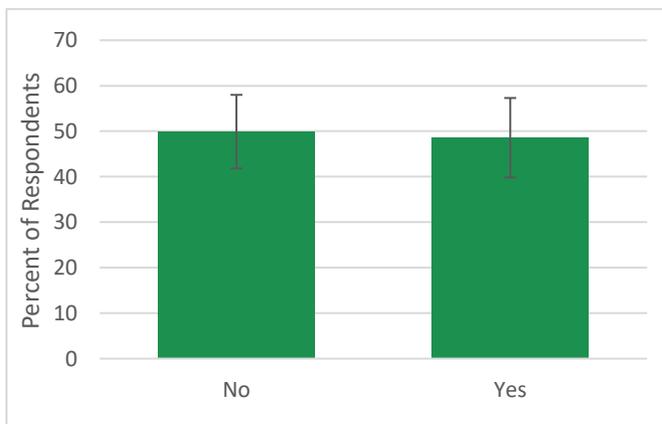

Rowan EMS has been administering Naloxone since 2010 and has provided over 1,428 doses to Rowan residents as of the first quarter of 2018 (2017 and 2018 numbers are provisional). Beyond EMS usage of Naloxone, kits have been distributed to the general public. When asked in the Community Opinion Survey, 48.5% of Rowan residents confirmed that they had heard of the Narcan Rescue Kit Distribution program. When told of the program, if not previously aware, 59.9% of respondents thought this was a “very important” program for the community, but 63.8% reported they were not at all likely to utilize the program (Figure 49, 50).

**Figure 48: EMS Administrations of Naloxone, Rowan County\***

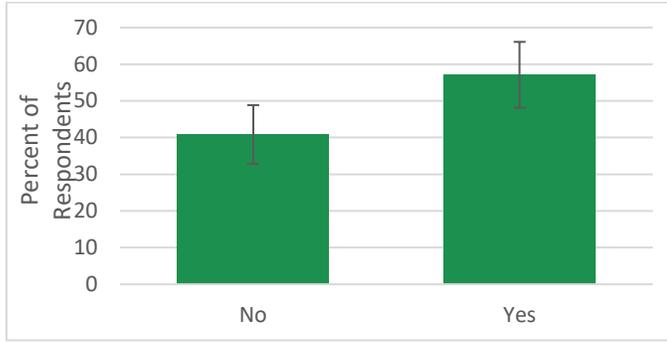

**Figure 502: Importance of Narcan Rescue Kits**

Source: Rowan County Community Opinion Survey, 2018

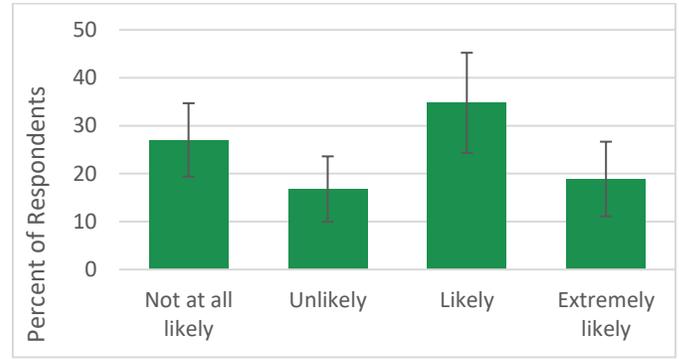

More respondents were aware of the Medication Take Back Box program, with 57.1% reporting they knew about it. 68.9% thought they were very important; however, responses were mixed as to whether they would utilize the program (Figure 51, 52).

**Figure 51: Awareness of Medication Take Back Box program**

Source: Rowan County Community Opinion Survey, 2018

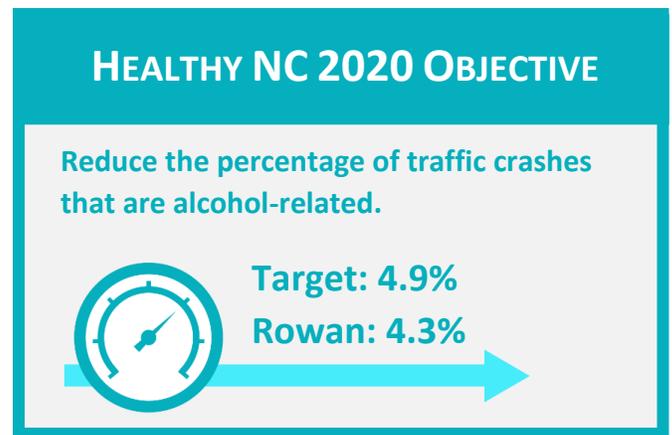

**Figure 52: Likelihood of Utilization of Medication Take Back Box Program**

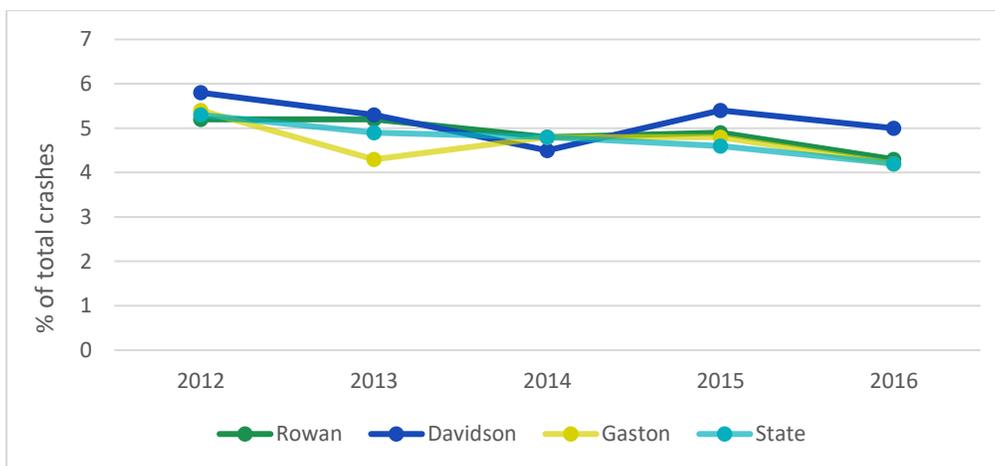

Source: Rowan County Community Opinion Survey, 2018

## Alcohol Abuse

Excessive alcohol consumption can put individuals at higher risk for kidney disease and driving under the influence can put them at higher risk of motor vehicle crash and death. The Healthy NC 2020 goal is to reduce the percentage of alcohol-related traffic crashes to 4.9%. As of 2016, Rowan is meeting that goal at 4.3% (Figure 53).

**Figure 53: Alcohol-Related Motor Vehicle Crashes**

Source: North Carolina Crash Data, the UNC Highway Safety Research Center, the NC Governor’s Highway Safety Program, and the NC Division of Motor Vehicles, Reportable Crashes on Publicly Maintained Roads, Year and Crash Alcohol Involvement, 2013-2017.

# Tabulated Comparison to Healthy NC 2020 Goals

The following table shows the Healthy NC 2020 targets compared to primary and secondary data for Rowan County. Only the targets for which county-level data are available are shown below. For a full list of the Healthy NC 2020 targets, please visit the North Carolina Division of Public Health’s website at <https://publichealth.nc.gov/hnc2020/>.

Healthy NC 2020 Objective	Rowan*	NC†	2020 Target
<b>TOBACCO USE</b>			
1. Decrease the percentage of adults who are current smokers	19% (2018)	17.9% (2016)	13%
3. Decrease the percentage of people exposed to secondhand smoke in the workplace in the past seven days	12.8% (2018)	7.7% (2016)	0%
<b>PHYSICAL ACTIVITY AND NUTRITION</b>			
1. Increase the percentage of high school students who are neither overweight nor obese	51%**	67.7% (2015)	79.2%
2. Increase the percentage of adults meeting the CDC Aerobic Recommendations†	53.9% (2018)	48.1% (2015)	60.6%
3. Increase the percentage of adults who consume fruit one or more times per day†	89.1% (2018)	56.7% (2015)	69.7%
4. Increase the percentage of adults who consume vegetables one or more times per day†	95.6% (2018)	78.4% (2015)	84.7%
<b>INJURY AND VIOLENCE</b>			
1. Reduce the unintentional poisoning mortality rate (per 100,000 population)	23.7 (2012-16)	18.5 (2016)	9.9
3. Reduce the homicide rate (per 100,000 population)	8.5 (2012-16)	7.5 (2016)	6.7
<b>MATERNAL AND INFANT HEALTH</b>			
1. Reduce the infant mortality racial disparity between whites and African Americans	6.7 (2012-16)	2.68 (2016)	1.92
2. Reduce the infant mortality rate (per 1,000 live births)	7.5 (2012-16)	7.2 (2016)	6.3
3. Reduce the percentage of women who smoke during pregnancy	15.6% (2016)	8.9% (2016)	6.8%
<b>SEXUALLY TRANSMITTED DISEASE AND UNINTENDED PREGNANCY</b>			
3. Reduce the rate of new HIV infection diagnoses (per 100,000 population)	17.0 (2016)	13.9 (2016)	22.2
<b>SUBSTANCE ABUSE</b>			
2. Reduce the percentage of traffic crashes that are alcohol-related	4.3% (2016)	4.2% (2016)	4.7%
3. Reduce the percentage of individuals aged 12 years and older reporting any illicit drug use in the past 30 days	N/A	9.9% (2015-16)	6.6%

Healthy NC 2020 Objective	Rowan	NC*	2020 Target
<b>MENTAL HEALTH</b>			
1. Reduce the suicide rate (per 100,000 population)	18.2 (2012-16)	13.0 (2016)	8.3
2. Decrease the average number of poor mental health days among adults in the past 30 days	2.9 (2018)	3.8 (2016)	2.8
<b>ORAL HEALTH</b>			
1. Increase the percentage of children aged 1-5 years enrolled in Medicaid who received any dental service during the previous 12 months	46.6% (2011)	60.4% (2016)	56.4%
<b>ENVIRONMENTAL HEALTH</b>			
1. Increase the percentage of air monitor sites meeting the current ozone standard of 0.075 ppm	100% (2017)	100% (2014-16)	100%
<b>INFECTIOUS DISEASE AND FOODBORNE ILLNESS</b>			
2. Reduce the pneumonia and influenza mortality rate (per 100,000 population)	34.5 (2012-16)	16.5 (2016)	13.5
<b>SOCIAL DETERMINANTS OF HEALTH</b>			
1. Decrease the percentage of individuals living in poverty	18.0% (2012-16)	13.6% (2016)	12.5%
2. Increase the four-year high school graduation rate	83.9% (2012-16)	86.5% (2016-17)	94.6%
3. Decrease the percentage of people spending more than 30% of their income on rental housing	39.6% (2012-16)	46.9% (2016)	36.1%
<b>CHRONIC DISEASE</b>			
1. Reduce the cardiovascular disease mortality rate (per 100,000 population)	180.7 (2012-16)	214.1 (2016)	161.5
2. Decrease the percentage of adults with diabetes	11.4% 2014	11.3% (2016)	8.6%
3. Reduce the colorectal cancer mortality rate (per 100,000 population)	16.9 (2012-16)	13.2 (2016)	10.1
<b>CROSS-CUTTING</b>			
1. Increase average life expectancy (years)	75.3 (2012-16)	78.0 (2016)	79.5
2. Increase the percentage of adults reporting good, very good, or excellent health	74.8% (2018)	81.7% (2016)	90.1%
3. Reduce the percentage of non-elderly uninsured individuals (aged less than 65 years)	12.7% (2016)	13.0% (2016)	8%

\*Rowan data are from a variety of local, state, and federal sources, including the 2018 Rowan Community Health Opinion Survey, UNC Highway Safety Research Center, NC State Center for Health Statistics, U.S. Census Bureau, County Health Rankings, CDC National Center for Health Statistics, and the U.S. Environmental Protection Agency.

# Chapter 4: Community Priorities

## Focus Areas

After data was collected from the Community Opinion Survey, the focus groups, and secondary data sources it was presented at two Steering Committee meetings on July 11<sup>th</sup> and August 8<sup>th</sup>, 2018. At these meetings, Steering Committee members were asked to share their opinions on what data should be acted upon at the end of the assessment process. Their feedback, combined with the top concerns and priorities reported in the Community Opinion Survey and Focus Groups, helped inform the Advisory Group's selection of 9 focus areas:

- Affordable Housing and Homelessness
- Violent Crime
- Child Abuse and Neglect
- Transportation to Essential Health and Human Services
- Employment and Workforce Readiness
- Access to Health Care
- Healthy Lifestyle Behaviors
- Substance Use
- Mental Health

## Voting Process

On September 26<sup>th</sup>, 2018, a Steering Committee meeting was held at Rowan County Department of Social Services and the public was invited to participate. It was well attended by both Steering Committee members, Advisory Group members, and county residents with a turnout of 58 people. After a presentation of the most salient data on each of the focus area topics, each attendee was invited to submit an anonymous vote on a paper ballot of their top three priorities. The ballots asked people to vote their top three in two categories, most important to the community and most actionable and realistic. A total of 54 ballots were cast, and yielded the focus areas of Substance Use, Mental Health, and Healthy Lifestyle Behaviors (Table 8, 9, 10).

## Next Steps: Action Plans

After the priorities were selected, the Advisory Group convened three Action Planning meetings with stakeholders in each of the focus areas on October 8<sup>th</sup>, October 18<sup>th</sup>, and October 23<sup>rd</sup>, 2018. Using an A3 planning tool, participants identified the current condition, root causes, measures, specific actions and activities that could be implemented to address each of the three priorities and what measurements would indicate progress. The proposed action plans generated from these meetings are available in Appendix D- Action Plans.

**Table 8: Ballots Cast For 'Most Important'**

FOCUS AREA	Total Votes	Rank
Substance Use Disorders	53	1
Mental Health	30	2
Healthy Lifestyle Behaviors	20	3
Child Abuse and Neglect	15	4
Violent Crime	12	5
Employment and Workforce Readiness	11	6
Access to Healthcare	10	7
Affordable Housing and Homelessness	5	8
Transportation to Essential Health and Human Services	4	9

**Table 9: Ballots Cast For 'Most Realistic, Most Actionable'**

FOCUS AREA	Most Actionable	Rank
Substance Use Disorders	42	1
Mental Health	21	2
Healthy Lifestyle Behaviors	21	3
Employment and Workforce Readiness	17	4
Access to Healthcare	14	5
Child Abuse and Neglect	11	6
Violent Crime	11	7
Transportation to Essential Health and Human Services	10	8
Affordable Housing and Homelessness	9	9

**Table 10: Combined Results**

FOCUS AREA	Combined	Rank
Substance Use Disorders	95	1
Mental Health	51	2
Healthy Lifestyle Behaviors	41	3
Employment and Workforce Readiness	28	4
Child Abuse and Neglect	26	5
Violent Crime	24	6
Access to Healthcare	23	7
Transportation to Essential Health and Human Services	14	8
Affordable Housing and Homelessness	14	9

# Chapter 5: Prevention and Health Promotion Resources

The following section represents select resources that exist and ones that are needed. The resources listed are not exhaustive. For more resources on each of the priority areas, please visit NC 2-1-1, a resource and referral service provided by the United Way of North Carolina: <https://www.nc211.org/>

## 1. Substance Use

### Treatment Providers in Rowan County

#### Daymark Recovery Services, Rowan Center

Address: 2129 Statesville Boulevard, Salisbury, NC 28147

Web: <http://www.daymarkrecovery.org/>

#### Cardinal Innovations Healthcare Solutions, Piedmont Community Office

Address: 4855 Milestone Ave., Kannapolis, NC 2808

Web: <https://www.cardinalinnovations.org/>

#### Capstone Recovery Center

Address: 418 W. Innes St., Salisbury, NC 28144

Web: <http://www.capstonerecoverycenter.org/>

#### Genesis A New Beginning

Address: 625 West Innes Street, Suite 201, Salisbury, NC 28144

Web: <https://www.genesis-anb.com/>

#### Treatment Centers LLC, Rowan Treatment Associates

Address: 448 Jake Alexander Boulevard West, Salisbury, NC 2814 7

Web: <http://nctreatmentcenters.com/rowan-treatment.html>

#### Veterans Affairs Medical Center, Substance Abuse Residential Rehab

Address: 1601 Brenner Avenue, Unit 4-4 Building 4, Salisbury, NC 28144

Web: <https://www.salisbury.va.gov/>

### Current Programs and Collaborations

**Rowan County Health Department (RCHD)** currently runs two interventions focused on reducing the medication and drug poisoning deaths in Rowan County. The Narcan Rescue Kit Distribution Program has prepared 135 kits and distributed 100 kits to 4 of the 9 pharmacies in Rowan County. RCHD has collaborated with the Emergency Services and Telecommunications team so that 911 operators receiving calls for an overdose can ask callers if they have access to a Narcan Rescue Kit. The Medication Take-back box program is in collaboration with local law enforcement to install 14

collection boxes. In 2017, law enforcement removed 2,734 pounds of unused and expired medication. The drop boxes can be found at the following locations:

- China Grove Town Hall
- Cleveland Town Hall
- Granite Quarry Police Department
- Kannapolis Police Department
- Moose Pharmacy
- Novant Health Rowan Medical Center
- Rockwell Police Department
- Rowan County Cooperative Extension
- Rowan County Health Department
- Rowan County Sheriff's Office, Landis location
- Rowan County Sheriff's Office, Salisbury location
- Rufty-Holmes Senior Center
- Salisbury Police Department
- Spencer Police Department

The **Opioid Task Force** was created two years ago at the prompting of county commissioners. It is led by the RCHD along with partners including the Center for Prevention Services, law enforcement, EMS, and others. Currently, the task force efforts include creating a resource directory, reducing harm through a syringe exchange, education to county leadership, working with law enforcement and EMS to create a live map of overdoses, and providing pregnant and using women with whole person support through a SUN Clinic. Future work may include the development of a Quick Response Team (QRT), composed of a social worker, a police officer, and a peer specialist.

**Cardinal Innovations**, in partnership with Rowan County Partners Community Group, the RCHD, and Healthy Rowan, is hosting a conference to educate business leaders and community leaders on whole person health.

The **Drug Free Community Support Program** received a 5-year federal grant to focus on preventing adolescent use of alcohol and prescription drugs and forming a community-level coalition.

## Programs and Resources Needed

- Long-term treatment facility: Currently Rowan County only has one, Capstone Recovery Center, which only serves females. A facility treatment is needed for males. A long-term treatment facility is needed that is free of charge and approaches recovery holistically.
- A detox center
- Additional counseling services and facilities, especially low-cost and no-cost options
- Harm reduction services
- Greater capacity to offer medication assisted therapy (MAT) through the Community Care Clinic of Rowan County and through Primary Care Physicians
- Resources for law enforcement to connect people who overdose with treatment
- Development of a Quick Response Team (QRT) to deliver crisis intervention services
- Trauma-informed prevention education for all age groups providing information on Hepatitis C and HIV/AIDS

## 2. Mental Health

### Treatment Providers in Rowan County

#### Cardinal Innovations Healthcare Solutions, Carter House

Address: 600 W Innes St, Salisbury, NC 28144

Web: <https://www.cardinalinnovations.org/>

## Circle of Hope, funded through the Michael Yang Foundation

Address: 2290 Statesville Blvd., Salisbury, NC 28147

Web: [http://michaelyangfound.org/index.php?option=com\\_content&view=article&id=4&Itemid=3](http://michaelyangfound.org/index.php?option=com_content&view=article&id=4&Itemid=3)

## Daymark Recovery Services, Rowan Center

Address: 2129 Statesville Boulevard, Salisbury, NC 28147

Web: <http://www.daymarkrecovery.org/>

## Family Crisis Council

Address: Rufty-Holmes Senior Center, 1120 Martin Luther King Jr. Ave. S., Salisbury, NC 28144

Web: <https://ruftyholmes.org/lunch-clubs/>

## Lifeworks Behavioral Health

Address: 612 Mocksville Ave #2, Salisbury, NC 28144

Web: <https://www.novanthealth.org/rowan-medical-center/services/behavioral-health.aspx>

## National Alliance on Mental Illness (NAMI) - Rowan

Phone: (704) 640-8811 *address not listed*

Web: <https://www.nami.org/Local-NAMI/Details?state=NC&local=efb582e2-c613-41f5-91f8-60a4a66a5f4c>

## Novant Health Psychiatry – Salisbury

Phone: 315 Mocksville Ave., Salisbury, NC 28144

Web: <https://www.novanthealth.org/clinic-locations/novant-health-psychiatry---salisbury.aspx>

## NC 2-1-1

For a more comprehensive listing of individual mental health providers in Rowan County, please visit NC 2-1-1, a resource and referral service provided by the United Way of North Carolina: <https://www.nc211.org/>

## Programs and Resources Needed

- Emergency mental health services
- Adequate number of mental health providers
- Transitional level facility
- Programs to combat stigma, specifically among LGBTQ populations
- Free and low-cost mental health services
- A step-down program for inmates transitioning back into the community
- Interagency collaboration and coordination

# 3. Healthy Lifestyle Behaviors

## Resources in Rowan County

### The City of Salisbury, Parks and Recreation

Address: 217 S. Main St., Salisbury, NC 28144

Web: <http://salisburync.gov/Government/Parks-and-Recreation>

### KaBoom

Website enables a search of parks and playgrounds in Rowan County.

Web: <https://www.cardinalinnovations.org/>

### Lunch Clubs for Rowan County Older Adults

Address: Rufty-Holmes Senior Center, 1120 Martin Luther King Jr. Ave. S., Salisbury, NC 28144

Web: <https://ruftyholmes.org/lunch-clubs/>

### Meals on Wheels of Rowan

Address: 1307 S. Salisbury Ave, Spencer, NC 28159

Web: <https://www.mowrowan.org/>

### Rowan County Parks and Recreation

Address: 425 Airport Road, Salisbury, NC 28147

Web: <https://www.rowancountync.gov/GOVERNMENT/Departments/ParksRecreation.aspx>

### The YMCA of Rowan County

Three locations in Rowan County: Salisbury, South Rowan, and East Rowan

Web: <http://www.rowanymca.com/#>

## Current Programs and Collaborations

**The Daily Mile** – Healthy Rowan has established this program in 10 Elementary schools, with support from the School District to have the program running in all Elementary schools by the beginning of next year. The Daily Mile allows for 15 minutes of instructional time for students to run, walk, or jog a mile each and every day.

**Rowan County Health Department (RCHD)** currently runs three interventions focused on increasing the consumption of fruits and vegetables and four programs aimed at reducing tobacco use.

- Cooking Matters at the Store provides two curriculums to teach low-income adults how to shop for fruits and vegetables on a budget.
- Farmers Market Nutrition Program partners with the Rowan County Farmer’s Market to enable recipients of WIC to purchase locally grown fruits and vegetables.

- The Faithful Families Eating Smart and Moving More program collaborates with local faith communities to teach a 9-session curriculum on nutrition and physical activity.
- The Tobacco Free Rowan website provides information to local businesses and organizations on tobacco-free policies.
- The Young Lungs at Play initiative assists municipalities to develop tobacco-free policies and has helped implement policies in five municipalities and one apartment complex.
- The Project Alert curriculum is aimed at prevention of substance abuse including tobacco with 7<sup>th</sup> and 8<sup>th</sup> graders and has been implemented for two consecutive years in a local middle school.
- Catch My Breath is a best-practices program aimed at reducing E-cigarette use in youth.

**Tobacco-free Parks** – In partnership with Rowan County Government and Healthy Rowan, policies were passed in 2018 to support tobacco-free parks at the County level.

**ARCHES/Adventure Rowan** – Healthy Rowan currently works with a local pediatric practice and the Salisbury Parks and Recreation department to encourage physical activity and promote healthy nutrition. Children ages 5 – 11 in the 95<sup>th</sup> percentile for BMI are referred into the family-based program which provides 60 minutes of physical activity and 15 minutes of nutrition education twice a week.

**The Healthy Food Pantry project** is a joint effort of Healthy Rowan agencies and Novant Health. Rowan Helping Ministries and Main Street Mission (Meeting and Marketplace) are both implementing environmental changes to support getting healthier food items to those most in need. Over the course of the next year Jeannie’s Kitchen, Rowan County’s only community kitchen, will be supporting healthy food and beverage policy changes to ensure all those who receive a meal are receiving nutritious and healthy meals.

**Go NAP SACC** is a program in partnership between the Rowan County Health Department, Smart Start Rowan, Salisbury-Rowan Community Action Agency (Head Start) and local child development/education centers. The program focuses on improving physical activity and nutrition standards by providing evidence-based curriculum, teacher training, and support for policy, systems, and environments.

## Programs and Resources Needed

- More sidewalk connections, bike lanes, and improved greenway access
- Increased public transportation access to places of physical activity
- Community gardens
- Community-wide programs to target food deserts and high-poverty areas with no or low-cost options for nutrition and recreation
- A repository to document outcomes and inventory resources
- Workplace Wellness programming that supports policies around healthy eating at worksites and encourages physical activity
- Three municipalities do not have tobacco-free park or building policies still. In addition, the County buildings need to become tobacco-free.

# Appendices

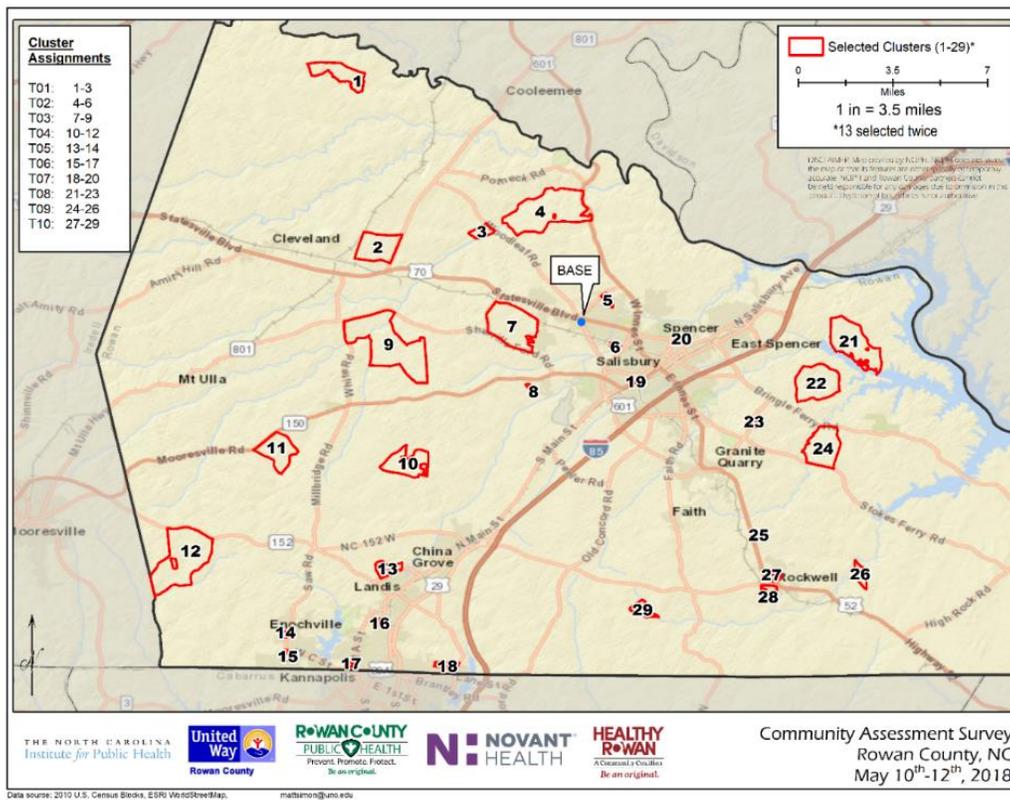

## A – Survey Methods, Instrument and Results

### Community Opinion Survey

A total of 169 interviews were conducted door-to-door by community volunteers, public health department staff and its partner agencies. Interviews were conducted between 10 a.m. and 6 p.m., Thursday to Saturday, May 10-12, 2018 and various evenings May 22 to June 12. Trained interviewers administered the Community Opinion Survey to community residents in randomly selected neighborhoods and at households throughout the county (Figure 1). The survey included questions related to community and personal health status and access to care (Q1-22), community issues and services (Q23-32), community improvement readiness (Q33-38), housing, physical environment and family (Q39-53) and household demographic characteristics (Q54-60).

Data collection protocol was submitted to the UNC Institutional Review Board (IRB). This submission was reviewed by the Office of Human Research Ethics, which determined that this submission does not constitute human subjects research as defined under federal regulations [45 CFR 46.102 (d or f) and 21 CFR 56.102(c)(e)(l)] and does not require IRB approval.

**Figure A.1. Community Assessment Survey Sample for Rowan County, 2018**

## Sampling

A two-stage cluster sampling method developed by the Centers for Disease Control and Prevention (CDC) and the World Health Organization (WHO) was employed, using population-based sampling weights from each U.S. Census block. Population weighted cluster sampling (PPS) allows the results to be generalized to the entire population of interest; however, stratification of results by sub-groups can result in imprecise estimates because of sample size. This method has been validated for rapid assessments of a variety of population-level public health needs and produces valid and precise estimates that are within +/- 10% of the “true” estimate<sup>1 2 3</sup>. The sampling frame consisted of ALL blocks in Rowan County, giving every resident a chance to participate. Twenty-nine blocks were randomly selected (PPS) with replacement. One block was selected twice for a total sample of 30 blocks. Within each selected block, seven random interview locations were identified, using local address building point data, for a total sample size of 210.

## Response Rates

Tracking forms were kept by survey teams to account for the outcome of each door that was knocked on. The success rate was 81.0% (169/210), while the response rate was 59.7% (169/317). This is a measure of cooperation and is calculated by dividing the number of completed interviews by the number of housing units where contact was made. The contact rate was 29.0%, which is a measure of effort and is calculated by dividing the total number of surveys completed by the total number of attempts. There were 289 contacts made during the sampling in nearly 587 attempts. This includes instances where there was no one home and a replacement address had to be selected. Tracking forms were not available for all completed interviews, so the response rate calculations are incomplete. These are all typical rates seen when conducting face-to-face interviews and do not indicate a high probability that bias exists in the sample.

## Demographic Comparison

Comparisons of the overall county frequencies and the sample were made in order to determine how representative the sample is (Table A.1). Based on these comparisons, the sample shows good alignment with the overall county population, allowing us to feel confident that our sample is representative of the county population overall. Sub-populations that are underrepresented were targeted with focus groups.

## Interpretations and Limitations

The survey methodology produces data that is generalizable to the county level. The two-stage cluster sampling method randomly selects areas throughout the sample area based on population, creating a representative sample of residents throughout the sample frame (Rowan County). Each response is weighted such that the total number of responses equals the total population in all of Rowan County. The weighted percentage therefore represents the estimated percent of the responses for the entire sampling frame, within a given certainty, shown by the confidence interval. If the survey were to be repeated 100 times, the 95% confidence interval represent the range of values that would be expected in 95 out of 100 instances. In other words, we have 95% confidence that the true value is within that range.

The limitation of this methodology, which is designed to be representative of each county, is that we are unable to examine sub-county populations or specific areas within the county *with precision*. Results can be stratified, but the confidence intervals become so wide that the results are not meaningful. Efforts to focus on specific areas or groups typically include targeted surveys, key informant interviews, or focus groups and listening sessions.

## Community Opinion Survey Instrument

### 2018 Rowan County Community Survey

### ***Read the following section to each potential participant:***

***Hello, I am \_\_\_\_\_ and this is \_\_\_\_\_ representing the Rowan County United Way, Rowan County Health Department, Healthy Rowan and the Novant Health Rowan Medical Center. We are conducting a survey to learn more about the health and topics of concern among Rowan County residents. We will use the results of this survey to help create action plans to address major community health issues in Rowan County.***

***Your neighborhood was one of many randomly selected in the County. The survey is voluntary, and it should take no longer than 20 minutes to complete. Your answers will be completely confidential. The information you give us will not be linked to you in any way.***

**Would you like to participate?  Yes  No**

*(If no, stop the survey here and thank the person for his or her time.)*

### **Eligibility**

**We are only interviewing adults 18 and older. Are you 18 years old or older?  Yes  No**

*(If no, ask if you can speak with someone who is 18 years or older. If no one is available, stop the survey here and thank the person for his or her time.)*

**Do you live in this household?  Yes  No**

*(If no, ask to speak with someone who does live there. If no one is available, stop the survey here and thank the person for his or her time.)*

If there is anything that we ask or say that you do not understand, or you would like further explanation about any item, please do not hesitate to ask.

### Part 1: Community and Personal Health Status and Access to Care

This first set of questions covers community issues and your own personal health. Remember, the answers you give for this survey will not be linked to you in any way.

1. Where do you go **most often** when you are sick? (*DO NOT read the options. Mark only the one they say. If they cannot think of one, read: Here are some possibilities. Read responses. Choose only one please.*)

- Doctor's office (primary care)
- Health department
- Hospital Emergency Room
- Urgent Care Center
- Community Clinic
- Other: \_\_\_\_\_
- Refused to answer*

2. In the past 12 months, did you have a problem getting the health care you needed **for you personally or for a family member** from any kind of health care provider including from a pharmacy or mental health provider or a substance use treatment center?

- Yes
- No (*skip to Q5*)
- Refused to answer (skip to Q5)*

3. Since you said “yes,” what type of provider or facility, did you or your family member have trouble getting health care from? You can choose as many of these as you need to. If there was a provider that you tried to see but we do not have listed here, please tell me and I will write it in. (*Give participant handout, offer to read providers.*)

- Dentist
- General practitioner/primary care
- Eye care/ optometrist/ ophthalmologist
- Pediatrician
- OB/GYN
- Mental health care provider
- Substance abuse treatment center
- Pharmacy
- Health department
- Hospital
- Urgent Care Center
- Medical Clinic
- Specialist (*What type?*) \_\_\_\_\_
- Other \_\_\_\_\_
- Refused to answer*

4. What were the problems that prevented you or your family member from getting the necessary health care? (*Read problems only if necessary.*)

- No health insurance.
- Insurance didn't cover what I/we needed.
- Share of the cost (deductible /co-pay) was too high.
- Pharmacy hours didn't work with my schedule.
- Pharmacy was too far away.
- No way to get there.
- Service was not available in Rowan County
- Not enough providers offer the service

- Doctor would not take my/our insurance or Medicaid.
- Hospital would not take my/our insurance.
- Dentist would not take my/our insurance or Medicaid.
- Didn't know where to go.
- Couldn't get an appointment.
- The wait was too long.
- I didn't have childcare.
- Other: \_\_\_\_\_
- Refused to answer*

5. Considering both your mental and physical health, would you say that, in general, your health is ...  
*(Read choices and choose only one.)*

- Excellent
- Very good
- Good
- Fair
- Poor
- Don't know/not sure
- Refused/No response*

6. Now I have a list of health conditions that I would like to ask you about. I will first ask if you have been diagnosed with the condition and then if you have, please tell me if you have had problems accessing services. So, in the past year, has a doctor, nurse, or other health professional diagnosed you with any of the following illnesses or conditions? You can tell me yes or no.

	Diagnosis			Problems accessing services	
a. Asthma	<input type="radio"/> Yes	<input type="radio"/> No		<input type="radio"/> Yes	<input type="radio"/> No
b. Mental health diagnosis (depression, anxiety, etc.)	<input type="radio"/> Yes	<input type="radio"/> No		<input type="radio"/> Yes	<input type="radio"/> No
c. High blood pressure	<input type="radio"/> Yes	<input type="radio"/> No		<input type="radio"/> Yes	<input type="radio"/> No
d. High cholesterol	<input type="radio"/> Yes	<input type="radio"/> No		<input type="radio"/> Yes	<input type="radio"/> No
e. Diabetes (not in pregnancy)	<input type="radio"/> Yes	<input type="radio"/> No		<input type="radio"/> Yes	<input type="radio"/> No
f. Overweight/Obesity	<input type="radio"/> Yes	<input type="radio"/> No		<input type="radio"/> Yes	<input type="radio"/> No
g. Lung disease	<input type="radio"/> Yes	<input type="radio"/> No		<input type="radio"/> Yes	<input type="radio"/> No
h. Dementia/Short-term memory loss	<input type="radio"/> Yes	<input type="radio"/> No		<input type="radio"/> Yes	<input type="radio"/> No
i. Vision or hearing loss	<input type="radio"/> Yes	<input type="radio"/> No		<input type="radio"/> Yes	<input type="radio"/> No
j. Liver disease	<input type="radio"/> Yes	<input type="radio"/> No		<input type="radio"/> Yes	<input type="radio"/> No
k. Cancer	<input type="radio"/> Yes	<input type="radio"/> No		<input type="radio"/> Yes	<input type="radio"/> No

7. Would you support a tobacco-free policy for the County?

- Yes
- No
- Don't know/Not Sure*
- Refused*

8. Do you currently smoke cigarettes or use any kind of tobacco product on a daily basis? This could include smokeless tobacco like dip or chewing tobacco, e-cigarettes, vape pens or juuls. *(E-cigarettes, vape pens and juuls (pronounced "jewels") are electronic devices that heat a liquid form of nicotine to generate a vapor that the user inhales.)*

- Yes
- No
- Don't know/Not Sure*
- Refused*

9. During this past week were you exposed to secondhand smoke at home, in a car or your workplace? (Note: Check all that apply, follow-up with specific location if necessary)

- |  |  |
|--|--|
| <input type="checkbox"/> Yes, at home  | <input type="checkbox"/> No                  |
| <input type="checkbox"/> Yes, in a car | <input type="checkbox"/> Don't know/Not Sure |
| <input type="checkbox"/> Yes, at work  | <input type="checkbox"/> Refused             |

10. During a typical week, how much time are you physically active? (Choose one)

- |   |  |
|---|--|
| <input type="radio"/> None ( <i>skip to Q12</i> )   | <input type="radio"/> 101 to 150 minutes per week          |
| <input type="radio"/> Less than 30 minutes per week | <input type="radio"/> 151 minutes or more (over 2.5 hours) |
| <input type="radio"/> 30 to 60 minutes per week     | <input type="radio"/> Refused                              |
| <input type="radio"/> 61 to 100 minutes per week    |  |

11. Where do you engage in exercise or physical activities? (check all that apply then **SKIP TO #13** unless the response is "I don't exercise." Continue on to #12 if respondent does NOT exercise)

- |   |   |
|---|---|

12. Are there any reasons why you don't exercise? You can give as many reasons as you need.

(Let them answer and repeat the category checked in the list. Select all that apply.)

- |  |   |
|--|---|
| <input type="checkbox"/> I don't like to exercise/lack of motivation           | <input type="checkbox"/> I don't have access to a facility that has the things I need, like a pool, track, etc. |
| <input type="checkbox"/> I would need child care and I don't have it           | <input type="checkbox"/> There is no safe place to exercise   |
| <input type="checkbox"/> It costs too much to exercise (equipment, shoes, gym) | <input type="checkbox"/> Lack of time/too busy  |
| <input type="checkbox"/> I'm physically unable                                 | <input type="checkbox"/> I don't need to exercise   |
| <input type="checkbox"/> I'm too tired to exercise                             | <input type="checkbox"/> Other (specify): _____   |
| <input type="checkbox"/> Lack of transportation                                | <input type="checkbox"/> Don't know/Not Sure  |
|  | <input type="checkbox"/> Refused  |

13. Most of us don't eat healthy all the time. When you aren't eating a healthy diet, what do you think makes it hard for you to eat healthy? Tell me all that apply. (Read choices. Choose all that apply.)

- Healthy food costs too much
- Healthy food doesn't taste good
- I don't know how to prepare the food we like (or food in general) in a healthy way
- I don't know what foods are healthy
- Convenience – it takes too much time to shop for and prepare healthy choices when I am busy
- It's hard to find healthy choices when you eat outside the home
- Nobody else in my family would eat it
- There aren't places in my neighborhood to buy healthy foods
- Other: \_\_\_\_\_

*I don't want to answer*

**14. In the last 12 months, did you or others in your household ever cut the size of a meal, use a food pantry, seek reduced cost community meals, or skip meals because there wasn't enough money for food?**

*(Choose one)*

- Yes                       No                       *Refused to answer*

**15. Thinking about breakfast, lunch and dinner, how many times in a typical week do you eat meals that were not prepared at home, like from restaurants, cafeterias, reduced cost community meal options or fast food? *(Read choices. Choose one.)***

- Never               Once a week or less               2-3 times a week               More than 3 times a week               *Refused to answer*

**16. About how many servings of fruit do you eat each day? *(Show fruit and veggie handout)***

- None               1-2               3-4               5+               *Refused*

**b. About how many servings of vegetables do you eat each day?**

- None               1-2               3-4               5+               *Refused*

**17. Have you ever been to the Salisbury-Rowan Farmer's Market?**

- Yes                       No                       *Refused to answer*

**18. Now thinking about your mental health, which includes stress, depression, anxiety and problems with emotions, for how many days during the past 30 days was your mental health not good? *(If respondent falters on providing exact number, prompt them with "Would you say 1 week, 2 weeks, 3 weeks, or 4 weeks?")*.**

- \_\_\_\_\_ Number of days               *Don't know/Not Sure*  
 *Refused*

**19. If a friend or family member needed counseling for a mental health or a drug/alcohol abuse problem, who is the first person you would tell them to talk to? *(DO NOT read the options. If they can't think of anyone... Here are some possibilities. Please choose only one.)***

- |   |  |
|---|--|
| <input type="radio"/> Private counselor or therapist    | <input type="radio"/> Minister/religious official/church |
| <input type="radio"/> Support group (e.g., AA, Al-Anon) | <input type="radio"/> Other: _____                       |
| <input type="radio"/> School counselor                  | <input type="radio"/> <i>Don't know</i>                  |

| <input type="radio"/> Family/friends                    |  |
| <input type="radio"/> Community agency                  |  |

**20. How long has it been since you last visited a dentist or a dental clinic for a routine checkup? (Read categories if necessary)**

- Within the past year (<1 year) *(skip to Q22)*
- Within the past 2 years (1-2 years) *(skip to Q22)*
- Within the past 5 years (2+ to 5 years) *(skip to Q22)*
- 5 or more years ago *(continue to Q21)*
- Never been to a dentist *(continue to Q21)*
- Don't know/Not Sure
- Refused

**21. What are some of the reasons you have never visited a dentist, or it has been more than 5 years? (Choose all that apply, prompt with responses if necessary)**

- Lack of dental insurance
- Cost – too expensive or can't afford the services
- Fear of dentist
- Haven't needed to go (no need)
- Other (specify): \_\_\_\_\_
- Refused

**22. What type of health insurance do you currently have?**

- Private or employer provided insurance
- Medicaid
- Medicare
- NC Health Choice
- TriCare (Military or veteran's insurance)
- Community Care Plan
- ACA Marketplace / Obamacare
- I do not have health insurance
- Other (specify): \_\_\_\_\_
- Refused

## Part 2: Community issues and services

**23. Please look at this list of health and safety issues in the community. (Give person the sheet of issues.) In your opinion, which THREE issues most affect the quality of life in Rowan County? If you would like, I can read these out loud as you think about them. The next question will cover another set of community issues. (Read health and safety problems if they prefer to have them read.)**

- Alcohol abuse
- Abuse of the elderly
- Child neglect and abuse
- Discrimination/ racism
- Domestic/sexual violence
- Gang involvement/activity
- Illicit drug abuse
- Lack of/ inadequate health insurance
- Mental health concerns (depression, anxiety, dementia, etc.)
- Motor vehicle injuries including to bicyclists and pedestrians
- Prescription drug misuse abuse
- Reckless/drunk driving
- Smoking/tobacco use
- Theft
- Unintended pregnancies
- Violent crime (murder, assault)
- Other: \_\_\_\_\_
- I don't want to give an answer

**24. Now let's look another set of community issues and services. (Give person the sheet of issues.) In your opinion, which THREE issues or services most affects the quality of life in Rowan County? If you would like, I can read these out loud as you think about them. If there are other community problems or health issues that you consider important that are not on this list, please let me know and I will write them in. (Read issues if they prefer to have them read.)**

### Part 3: Community Improvement Readiness

**Read:** This next set of questions will ask about community resources within the county and issues that Rowan County is considering working on. I will first ask if you are aware of a particular service or program and then how important you think this service or program is to Rowan residents and then how likely you or your family would be to use them. (*If response is NOT aware, then read definition of service or program before asking importance*).

**33. Let's start with existing recreation opportunities such as parks, activity centers and public pools.**

**a) Are you AWARE of these facilities and services in Rowan County?**

- Yes       No       *Refused*

**b) How IMPORTANT are these facilities and services to Rowan County?**

- Not at all       Slightly       Moderately       Very       *Refused*

**c) How LIKELY are you or your family to use these facilities or services?**

- Not at all       Unlikely       Likely       Extremely       *Refused*  
(*ask d*)                      (*ask d*)

**d) If unlikely or not all likely to use the facilities, why? \_\_\_\_\_**

(*if needed, prompt with: lack of transportation, tobacco use, inconvenient hours, no time, or just lack of interest in existing programs*)

**34. How about free or low-cost primary care offered at community health clinics?**

a) Are you AWARE of these facilities and services in Rowan County?

- Yes       No       *Refused*

b) How IMPORTANT are these facilities and services to Rowan County?

- Not at all       Slightly       Moderately       Very       *Refused*

c) How LIKELY are you or your family to use these facilities or services?

- Not at all       Unlikely       Likely       Extremely       *Refused*

**35. How about the Narcan Rescue Kit Distribution program?**

a) Are you AWARE of this program in Rowan County?

- Yes       No       *Refused*

b) How IMPORTANT is this program to Rowan County?

- Not at all       Slightly       Moderately       Very       *Refused*

c) How LIKELY are you or your family to use this program?

- Not at all       Unlikely       Likely       Extremely       *Refused*

**36. How about the Medication Take-back Box Program?**

a) Are you AWARE of this program in Rowan County?

- Yes       No       *Refused*

b) How IMPORTANT do you think this program is to Rowan County?

- Not at all       Slightly       Moderately       Very       *Refused*

c) How LIKELY are you or your family to use this program?

- Not at all       Unlikely       Likely       Extremely       *Refused*

**37. How about help or referral services lines, such as 2-1-1?**

a) Are you AWARE of this service in Rowan County? *(If no, explain 2-1-1)*

- Yes             No             *Refused*

b) How IMPORTANT is this service to Rowan County?

- Not at all         Slightly         Moderately         Very         *Refused*

c) How LIKELY are you or your family to use this service?

- Not at all         Unlikely         Likely             Extremely         *Refused*

**38. How about programs to teach life skills, such as household finance, to adults?**

a) Are you AWARE of these services in Rowan County?

- Yes             No             *Refused*

b) How IMPORTANT do you think these services are to Rowan County?

- Not at all         Slightly         Moderately         Very         *Refused*

c) How LIKELY are you or your family to use these services?

- Not at all         Unlikely         Likely             Extremely         *Refused*

**Part 4: Housing, Physical Environment and Family**

This next set of questions are about housing and your physical environment.

**39. Does your household have working smoke and carbon monoxide detectors? *(Choose one.)***

- |   |  |
|---|--|
| <input type="radio"/> Yes, smoke detectors only           | <input type="radio"/> No                       |
| <input type="radio"/> Yes, carbon monoxide detectors only | <input type="radio"/> <i>Don't know</i>        |
| <input type="radio"/> Yes, both                           | <input type="radio"/> <i>Refused to answer</i> |

**40. Do you have any of the following housing issues or concerns? *(Give participant handout, offer to read choices, select all that apply)***

- |  |  |
|--|--|
| <input type="checkbox"/> Unable to pay rent          | <input type="checkbox"/> Concerns about your water |
| <input type="checkbox"/> Fear of losing your house   | <input type="checkbox"/> Structural safety issues  |
| <input type="checkbox"/> Unreliable heat source      | <input type="checkbox"/> Pest problems             |
| <input type="checkbox"/> Difficulty paying utilities | <input type="checkbox"/> None of the above         |
|  | <input type="checkbox"/> <i>Refused</i>            |

**41. Is there at least one vehicle available for use in your household?**

- Yes             No             *Refused*

42. How many children under the age of 18 are living in your household? (If none, skip to Q49)

\_\_\_\_\_ (enter number)

None  
(skip to Q49)

Refused  
(skip to Q49)

43. Is the child/children being raised by a single parent or guardian?

Yes

No

Refused

44. During the past year, have you or anyone within your household needed childcare assistance in order to maintain employment?

Yes

No (skip to Q45)

Refused to answer (skip to Q45)

b. If Yes, were you able to receive services?

Yes

No (ask follow-up)

Didn't seek services

Refused to answer

c. If No, what was the main reason? (Choose one)

Expense

Transportation

Other

Service availability  
(time, convenience,  
not available)

Didn't know where to go  
 Did not try to get help

(specify) \_\_\_\_\_

Don't know

Refused to answer

45. In the past year, have you needed any of the following childcare services but were not able to receive them? (Read list, check all that apply)

Childcare for an infant, toddler or preschool aged child (birth to 5 years)

Financial help to pay for childcare

Childcare for a child with a disability

None of the above

Before-school or afterschool care for a school-aged child (K-12)

Other \_\_\_\_\_

Refused

46. How well would you say your children are doing in school or preschool? (If in school skip to Q48)

Excellent

Very Good

Good

Fair

Poor

} (Skip to Q48)

Not in school/preschool (Ask Q47)

Refused (skip to 48)

47. What was the challenge that prevented them from being in school or preschool? (skip to Q49 after answering)

Preschool too expensive

Can't get to preschool in my area

Dropped out of high school because of academics

Other \_\_\_\_\_

- Dropped out of high school/expelled for behavior  *Refused*

48. What would you say are your child's biggest challenges in school? (*check all that apply*)

- |  |   |
|--|---|
| <input type="checkbox"/> Bullying                    | <input type="checkbox"/> Teen pregnancy           |
| <input type="checkbox"/> Drugs                       | <input type="checkbox"/> Stress/mental health     |
| <input type="checkbox"/> Doesn't take it seriously   | <input type="checkbox"/> Pressure to have sex     |
| <input type="checkbox"/> Behavior                    | <input type="checkbox"/> Peer pressure in general |
| <input type="checkbox"/> Academics – Literacy        | <input type="checkbox"/> Other _____              |
| <input type="checkbox"/> Academics – Math            | <input type="checkbox"/> <i>Refused</i>           |
| <input type="checkbox"/> Limited English Proficiency |   |

49. Now, thinking about your family and yourself, would you say feel safe in your neighborhood?

- Yes  No  *Refused*

(*If NO*) Why don't you feel safe in your neighborhood? \_\_\_\_\_

50. Do you feel the police are keeping crime out of your neighborhood?

- Yes  No  *Refused*

If no, why? \_\_\_\_\_

51. If you were a victim of a crime, do you have confidence the police department would be able to solve the crime?

- Yes  No  *Refused*

If no, why? \_\_\_\_\_

52. Have you or a member of your household been a victim of a crime in the last 12 months?

- Yes (*follow-up below*)  No  *Refused*

(*If yes*) Please indicate type of crime

- |                                   |   |
|-----------------------------------|---|
| <input type="checkbox"/> Property | <input type="checkbox"/> Violent (taking by force, assault, shooting) |
| <input type="checkbox"/> Theft    | <input type="checkbox"/> Other _____                                  |
| <input type="checkbox"/> Burglary | <input type="checkbox"/> <i>Refused</i>                               |

53. Do you have a friend or family member that has been affected by the use of prescription painkillers such as opioids or heroin? (*If YES ask follow-up questions*)

- Yes  No  *Refused*

Was it a friend or a family member?

- Friend  Family member  *Refused (skip follow-up)*

Did they seek treatment?

- Yes       No       *Refused*

If they didn't seek treatment, do you know why not? \_\_\_\_\_

## Part 5: Demographics

*READ: Alright! Thank you for your feedback. We have just a few more questions to ask that will help us determine if we talked to a representative sample of people from Rowan County. Remember everything you share with us will remain confidential and anonymous.*

**54. What is your age?** \_\_\_\_\_ (enter age)

- Refused*

**55. What is your gender?**

- Male  
 Female  
 Other  
 *Refused*

**56. Are you of Hispanic, Latino, or Spanish origin?**

- Yes  
 No  
 *Refused*

**57. Which one or more of the following would you say is your race?** (*Read list and listen for a response to each category. Check all that apply. If other, please write in the person's race.*)

- |  |   |
|--|---|
| <input type="checkbox"/> White/Caucasian   | <input type="checkbox"/> Native Hawaiian and other Pacific Islander |
| <input type="checkbox"/> Black or African American                                   | <input type="checkbox"/> Other race not listed here                 |
| <input type="checkbox"/> American Indian or Native American                          | _____   |
| <input type="checkbox"/> Asian (Chinese, Japanese, Korean, Vietnamese, Asian Indian) | <input type="checkbox"/> <i>Refused</i>                             |

**58. What is the highest grade or year of school you completed?** (*Read if necessary, choose one*)

- |   |   |
|---|---|
| <input type="radio"/> Less than 9th grade                       | <input type="radio"/> Associate's Degree or Vocational Training |
| <input type="radio"/> 9-12th grade, no diploma                  | <input type="radio"/> Bachelor's degree                         |
| <input type="radio"/> High school graduate (or GED/ equivalent) | <input type="radio"/> Graduate or professional degree           |
| <input type="radio"/> Some college (no degree)                  | <input type="radio"/> <i>Refused</i>                            |

**59. What was your total household income last year, before taxes? Let me know which category you fall into.**

(*Read choices. Give participant handout. Mark only one category.*)

- |  |  |
|--|--|
| <input type="radio"/> Less than \$10,000   | <input type="radio"/> \$35,000 to \$49,999 |
| <input type="radio"/> \$10,000 to \$14,999 | <input type="radio"/> \$50,000 to \$74,999 |
| <input type="radio"/> \$15,000 to \$24,999 | <input type="radio"/> \$75,000 to \$99,999 |
| <input type="radio"/> \$25,000 to \$34,999 | <input type="radio"/> \$100,000 or more    |
|  | <input type="radio"/> Refused              |

**60. Including yourself, how many people does that income support? Include those that you claim as a dependent or that live with you at least ½ of the year? (If Refused for Q59 ask: Including yourself, how many people live in your household?)**

(Enter #) \_\_\_\_\_

**(READ) Thank you so much for your time! Rowan County will be looking at the results of the survey and following up on some of the issues and concerns raised. Thank you again for your time (hand participant thank-you bag).**

## Definitions for Surveyors and Participants

2-1-1: This 24/7 service links citizens to needs ranging from basic assistance to health care such as community health clinics, food pantries, general legal aid, housing assistance, parenting skills classes and employment assistance for example. More than 500 agencies and programs in the Rowan County 2-1-1 database.

Adult Day Care: Services provided for adults who are unable to remain at home unattended, as well as adults who suffer from isolation. May include activities, meals, and medical supervision.

HMO: Health maintenance organization is a medical group that provides health services for a fixed annual fee

Medical Assistance: The Medicaid program in Rowan County provides medical assistance to low income individuals and families and includes the Medicare Savings Programs, Medicaid for Families and Children, and North Carolina Health Choice.

Medication Take-back Box Program: In Rowan County, the Public Health Department has partnered with local law enforcement to install 9 secure collection boxes for unwanted, unused, and expired prescription and non-prescription medications at multiple municipalities throughout the country

Medical homes: a team-based health care delivery model of primary care that is patient-centered, comprehensive, team-based, coordinated, accessible and focused on quality and safety.

Mobile crisis center: short-term crisis response, stabilization and intervention for adults and children experiencing a mental health or chemical dependency crisis. Mobile crisis teams can come to where the patient is and provide confidential, non-judgmental and respectful care and if needed, transport patients to a mental health center instead of an emergency department. Average response times are 2 hours for an in-person visit with a professional counselor. In Rowan County you can call a toll-free 24-Hour Crisis Hotline 866.275.9552 at any time. This service is managed by Daymark Recovery Services.

Narcan Rescue Kit: Narcan nasal spray is used to counteract and treat an opioid overdose. The kits include educational materials, treatment options, CPR shield, latex gloves, a reference for reporting, and a tracking system for Rowan county.

School-based health care: health clinics within primary and secondary school campuses that provide primary care, mental health care, substance abuse counseling, case management, dental health, nutrition health, health education and promotion.

## Community Opinion Survey Results

Q1. Where do you go most often when you are sick?

# B – Focus Group Instrument and Sample Demographics

## Focus Groups

As part of primary data collection, seven focus groups were held. The Community Health and Human Service Needs Assessment Advisory Group selected the focus group populations, which were:

- Youth
- Elderly and seniors
- Persons experiencing homelessness
- Persons living with physical disabilities
- Hispanic/Latinx
- Non-profit and government agency leaders
- Business leader

Qualitative data was gathered through seven 1 ½ hour focus groups, each made up of 5-12 participants. These focus groups were designed to sample populations that were under-sampled (Hispanic/Latino, youth, homeless and disabled populations) in the survey and to elicit data around attitudes and behaviors that were not captured in the survey.

The groups were recruited based on criteria established by the assessment team’s Advisory Group which relied on homogenous sampling methodology. Identified participants were recruited in-person, over the phone, and by email and flyer. All participants were required to be residents of Rowan County.

Each recruit was given an information sheet outlining what the focus group was about, that it was voluntary and confidential, that it would be recorded, and that they could withdraw their consent and leave the group at any time. Minor participants in the youth focus group were also required to provide parent or guardian consent for them to join the group and were asked for their own verbal assent. Focus groups participants were given refreshments and a \$15 gift card as an incentive.

A discussion facilitator and note taker participated in all focus group sessions.

### **Analysis**

Focus group recordings were transcribed, and the transcriptions were analyzed using Atlas.ti 8 software. A codebook was developed from the focus group guide and organized around applicability of information. Three coders independently coded each of the transcripts, iteratively adding to the codebook and discussing the definition of each code with others. Each transcript was then doubled coded for consistent application of codes. Code analysis was run for frequency and co-occurrence.

### **Interpretations and Limitations**

The interpretations presented here represent the main themes present in the focus groups as reflected in the notes. Focus groups are formed through purposive sampling and are therefore not representative of the members of the population as a whole. A limitation of this methodology is that focus groups do not yield generalizable data. Therefore, the opinions represented here are those of the members of the focus group.

## Focus Group Guide

### 2018 Rowan County Focus Groups

## DEMOGRAPHIC INFORMATION FORM

Questions will only be reported as a summary of answers given by all focus group participants in the Rowan County Community Health and Human Service Needs Assessment. Your answers will remain anonymous.

1. How old are you? \_\_\_\_\_ years old

2. What is your gender?

- Male
- Female
- Other

3. Are you of Hispanic, Latino, or Spanish origin?

- Yes
- No

4. Which one or more of the following would you say is your race?

- White/Caucasian
- Black or African American
- American Indian or Native American
- Asian (Chinese, Japanese, Korean, Vietnamese, Asian Indian)
- Native Hawaiian and other Pacific Islander
- Other race not listed here \_\_\_\_\_

**5. What is the highest grade or year of school you completed?**

- Less than 9th grade
- 9-12th grade, no diploma
- High school graduate (or GED/ equivalent)
- Some college (no degree)
- Associate's Degree or Vocational Training
- Bachelor's degree
- Graduate or professional degree

**6. What was your total household income last year, before taxes?**

- Less than \$10,000
- \$10,000 to \$14,999
- \$15,000 to \$24,999
- \$25,000 to \$34,999
- \$35,000 to \$49,999
- \$50,000 to \$74,999
- \$75,000 to \$99,999
- \$100,000 or more

**7. What is your zip code? \_\_\_\_\_**

## Focus Group Discussion Guide

1. What is it like for you and your household to live, work, or go to school in this community?
2. How has your community changed over the past five years?
  - a. Why do you think it has changed?
  - b. How have these changes influenced your health or human service needs?
3. What things concern you the most about living in Rowan County?
4. When you hear the words “healthy community,” what comes to mind? To you, what would a healthy community look like?
5. Have you or a member of your household had a human service need in the past year that was not met?
  - a. If yes, what was the need?
  - b. What were the barriers to getting this need met?
  - c. If the barriers were removed, what would be the reasons, if any, that you would choose not to access services?
6. Have you or a member of your household had a health care need in the past year that was not met?
  - a. If yes, what was the need?
  - b. What were the barriers to getting this need met?
  - c. If the barriers were removed, what would be the reasons, if any, that you would choose not to access services?
7. Are there groups of people within your community whose health or human service needs seem to be overlooked, or whose needs are not met?
8. Think back over the topics we’ve discussed. If you were in charge, what specific things would you do to improve the community?
  - a. Are there any resources or activities you would like to see in Rowan County that are not here now?

9. Of all the issues we have talked about today, what are the most important issues for your community to address?
10. Is there anything that we have not asked about or anything that you would like to add?
11. Do you have any questions about the community assessment process?

*Rowan County will be looking at the results of the survey and following up on some of the issues and concerns raised. Thank you again for your time.*

<b>Death Morbidity &amp; Mortality</b>	Mortality Rate Comparisons	Top 10 Leading Causes of Death in Rowan County, Five Year Counts and Rates (per 100,000 population), 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality
	Gender, Racial, and Age Disparities in Mortality	Top 15 Leading Causes of Death in Rowan County, Five Year Counts and Rates (per 100,000 population) by Sex, 2012-2016.	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality
		Top 15 Leading Causes of Death in Rowan County, Five Year Counts and Rates (per 100,000 population), by Race/Ethnicity, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality
		Top 3 Leading Causes of Death by Age Group, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality
	Cancer	Five-Year Aggregate of Total Cancer Mortality, by Race/Ethnicity and Sex, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County.
		Five-Year Aggregate of Mortality Rate for Total Cancer and the Five Major Site-Specific Cancers, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County.
		Five-Year Aggregate of Total Cancer Incidence (New Cases per 100,000 Population) and the Four Major Site-Specific Cancers, 2012-2016.	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), NC Cancer Incidence Rates per 100,000
		Five-Year Aggregate of Lung Cancer Mortality, by Race/Ethnicity and Sex, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County.
		Five-Year Aggregate of Prostate Cancer Mortality, by Race/Ethnicity for Males, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County
		Five-Year Aggregate of Breast Cancer Mortality, by Race/Ethnicity for Females, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County
		Five-Year Aggregate of Colon, Rectal, Anal Cancer Mortality, by Race/Ethnicity and Sex, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County
		Five-Year Aggregate of Pancreatic Cancer Mortality, by Race/Ethnicity and Sex, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County
	Heart Disease	Five-Year Aggregate of Heart Disease Mortality, by Race/Ethnicity and Sex, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County
	Cerebrovascular Disease	Five-Year Aggregate of Cerebrovascular Disease Mortality, by Race/Ethnicity and Sex, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County

Chronic Lower Respiratory Disease	Five-Year Aggregate of Chronic Lower Respiratory Disease/Chronic Obstructive Pulmonary Disease Mortality, by Race/Ethnicity and Sex, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County
Diabetes Mellitus	Five-Year Aggregate of Diabetes Mortality, by Race/Ethnicity and Sex, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County
	Annual Trends in Diabetes Prevalence, 2012-2014	Centers for Disease Control and Prevention, Diabetes Data and Trends, County Data and State Data
Alzheimer's Disease	Five-Year Aggregate of Alzheimer's Disease Mortality, by Race/Ethnicity and Sex, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County
Pneumonia and Influenza	Five-Year Aggregate of Pneumonia and Influenza Mortality, by Race/Ethnicity and Sex, 2012-2016.	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County
Septicemia	Five-Year Aggregate of Septicemia Mortality, by Race/Ethnicity and Sex, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County
Kidney Disease	Five-Year Aggregate of Kidney Disease Mortality, by Race/Ethnicity and Sex, 2012-2016.	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County
Chronic Liver Disease and Cirrhosis	Five-Year Aggregate of Liver Disease Mortality, by Race/Ethnicity and Sex, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County
Unintentional Motor Vehicle Injury	Five-Year Aggregate of Unintentional Motor Vehicle Injury Mortality, by Race/Ethnicity and Sex, 2012-2016.	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County
	Five-Year Aggregate Trends in Unintentional Motor Vehicle Injury Mortality Rate, 2009-2016	NC State Center for Health Statistics, Vital Statistics, NC Vital Statistics Volume II: Leading Causes of Death, 2009 through 2016
	Five-Year Aggregate of Unintentional Motor Vehicle Injury Mortality, by Age, 2012-2016	NC State Center for Health Statistics, Vital Statistics, NC Vital Statistics Volume II: Leading Causes of Death, 2009 through 2016
	Annual Trend in Number and Percentage of All Alcohol Related Motor Vehicle Crashes, 2012-2016	UNC Highway Safety Research Center, NC Governor's Highway Safety Program, NC Division of Motor Vehicles: North Carolina Crash Data, Reportable Crashes on Publicly Maintained Roads, Year and Crash, Alcohol Involvement, 2013-2017
	Annual Trend in Fatal Alcohol Related Motor Vehicle Crashes, 2012-2016	UNC Highway Safety Research Center, NC Governor's Highway Safety Program, NC Division of Motor Vehicles: North Carolina Crash Data, Reportable Crashes on Publicly Maintained Roads, Year and Crash, Alcohol Involvement, 2013-2017
Unintentional Non-Motor Vehicle Injury	Five-Year Aggregate of Other Unintentional Injury Mortality, by Race/Ethnicity and Sex, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County

	Unintentional Poisoning	Five-Year Aggregate of Unintentional Poisoning Mortality, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Age-Adjusted Death Rates by County
		Three-Year Aggregates of Opiate Poisoning Mortality Counts and Rates (per 100,000 population), 2000-2016	NC Division of Public Health Injury and Violence Prevention Branch, All Intent Opiate Poisoning Deaths by County: NC Residents, 1999-2016
		Quarterly Count of Naloxone Reversals by EMS in Rowan County, 2010-2016	NC Division of Public Health Injury and Violence Prevention Branch, NC Opioid Action Plan Dashboard
	Suicide	Five-Year Aggregate of Suicide Mortality, by Race/Ethnicity and Sex, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County
	Homicide	Five-Year Aggregate of Homicide Mortality, by Race/Ethnicity and Sex, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County
	HIV/AIDS/STDs	Annual Number and Rates of Incident HIV Diagnoses (per 100,000 population), by County of First Diagnosis, 2012-2016	NC Division of Public Health, Epidemiology Section, Communicable Disease Branch Annual Reports: North Carolina 2016 HIV/STD Surveillance Report
		Five-Year Aggregate of AIDS Mortality, by Race/Ethnicity and Sex, 2012-2016	NC State Center for Health Statistics, County-level Data, County Health Data Book (2018), Mortality, 2012-2016 Race/Ethnicity-Specific and Sex-Specific Age-Adjusted Death Rates by County
		Annual Trends in Chlamydia Incidence, 2012-2016	NC Division of Public Health, Epidemiology Section, Communicable Disease Branch Annual Reports: North Carolina 2016 HIV/STD Surveillance Report
		Annual Trends in Gonorrhea Incidence, 2012-2016	NC Division of Public Health, Epidemiology Section, Communicable Disease Branch Annual Reports: North Carolina 2016 HIV/STD Surveillance Report
	Obesity	Annual Trends in Adult Obesity Prevalence, 2014-2018	County Health Rankings and Roadmaps, 2014-2018
BMI Classification for Salisbury Pediatrics Patients Aged 0-18, August 2017 – August 2018		Salisbury Pediatrics, 8/1/2017 – 8/2/2018	
<b>Service Utilization</b>	Behavioral Health	Annual Counts of Persons Served by Local Management Entity-Managed Care Organizations, 2014-2017.	Log Into North Carolina (LINC) Database, Topic Group Vital Statistics and Health: Persons Served in Area Mental Health Programs
		Annual Counts of Persons Served by State Psychiatric Hospitals, 2014-2017	Log Into North Carolina (LINC) Database, Topic Group Vital Statistics and Health: Persons Served in State Psychiatric Hospitals
		Annual Counts of Persons Served by State Mental Health Development Centers, 2014-2016	Log Into North Carolina (LINC) Database, Topic Group Vital Statistics and Health: Persons Served in State Mental Health Development Centers
		Annual Counts of Persons Served by State Alcohol and Drug Treatment Centers, 2014-2016	Log Into North Carolina (LINC) Database, Topic Group Vital Statistics and Health: Persons Served in NC Alcohol and Drug Treatment Centers
	Emergency Department	Annual Number of Emergency Department Visits to County Facilities, Fiscal Years 2011-2014	UNC Cecil G. Sheps Center for Health Services Research, FY201-2014 Emergency Room Visits, NC Emergency Department Patient Characteristics by Hospital

		Annual Number of Emergency Department Visits to County Facilities, by Race, Fiscal Year 2014	UNC Cecil G. Sheps Center for Health Services Research, FY2014 Emergency Room Visits, NC Emergency Department Patient Characteristics by Hospital
		Annual Number of Emergency Department Visits to County Facilities, by Ethnicity, Fiscal Year 2014	UNC Cecil G. Sheps Center for Health Services Research, FY2014 Emergency Room Visits, NC Emergency Department Patient Characteristics by Hospital
		Annual Number of Emergency Department Visits to County Facilities, by Age, Fiscal Year 2014	UNC Cecil G. Sheps Center for Health Services Research, FY2014 Emergency Room Visits, NC Emergency Department Patient Characteristics by Hospital
		Annual Number of Emergency Department Visits to County Facilities, by Payer, Fiscal Year 2014	UNC Cecil G. Sheps Center for Health Services Research, FY2014 Emergency Room Visits, NC Emergency Department Patient Characteristics by Hospital.

## D – Action Plans

# Substance Use

Addiction to drugs or alcohol is a chronic health condition, and those who suffer from it are at risk for early death, certain diseases, injury and disability. Misuse of prescription painkillers and use of heroin and opiates have increased dramatically nationwide, including in North Carolina and in Rowan County. Substance abuse can contribute to family instability, loss of employment, child neglect, poverty, involvement in the criminal justice system and violence.

Objective: To increase access to education, harm reduction, crisis intervention, and long-term treatment to effectively reduce substance-use related mortality, disease burden and harm.

## Current Conditions

The widespread availability of drugs (over-prescription) and relative low expense with new synthetic substances becoming available.

85% of the children that were taken into RCDSS custody in 2018 have had parental substance use as a contributory factor.

The impact of opioid crisis is felt on all age levels.

Police and first responders could be better equipped to provide referral services to preventative care and treatment.

Rowan County lacks a detox center and a long-term treatment center, and there are insufficient low-cost or no-cost treatment centers.

Environmental factor of I-85 corridor through which heroin and opioids are trafficked.

## Measures of Progress

## Proposed Action Plans

Number of Emergency Department (ED) visits coded with overdose (OD)

Develop a Quick Response Team (QRT) including a social worker, police officer, and peer specialist.

Percentage of children in custody for a substance use related reason

Develop prevention and education programs that are trauma-informed for all age groups.

EMS administration of Naloxone

Increase harms-reduction programs including syringe exchange programs and naloxone distribution.

Drug-induced deaths/opiate-poisoning mortality rate

Establish a live information map of overdoses to target place-based reduction efforts.

Percentage of friends or relatives with known substance use disorder seeking treatment

Establish a detox and long-term treatment center in Rowan County.

Number of low-cost or no-cost addiction and counseling service providers

Increase the number of addiction treatment and counseling service providers that provide low-cost or no-cost.

# Healthy Lifestyle Behaviors

Chronic diseases are among the most common, costly and preventable health problems in the United States. Lifestyle risk factors include nutrition, physical activity, tobacco use and excessive alcohol consumption. Sufficient nutrition is important to human growth and development. However, excessive calorie intake can lead to obesity, which increases the risk of developing health conditions like type 2 diabetes, high blood pressure, heart disease, kidney disease and stroke. Increased physical activity helps reduce the risk of disease and contributes to mental well-being. Smoking is the leading cause of preventable death in the United States.

**Objective:** To promote an environment that ensures the availability of healthy and nutritious food to people of all ages, encourages residents to participate in physical activity, and reduces the use of cigarettes, JUULs, and other tobacco products to reduce the burden of chronic diseases on Rowan County.

## Current Conditions

Obesity rates are high and directly associated with causes of mortality, but prevention is less expensive than treatment.

Prevalence of chronic diseases, specifically diabetes, is high.

Food insecurity is an issue in our county, and food deserts exist in certain areas.

Many families do not know how to shop for health food and/or prepare healthy food.

Convenience and cost are barriers to healthy eating.

The use of medication sometimes facilitates poor lifestyle habits—the protective effects of a given medication may result in the continuation of unhealthy eating or lack of exercise.

Employers are not focused on employee health and very few workplace wellness programs exist.

## Measures of Progress

The percentage of children, high-school students, and adults who are neither overweight nor obese.

Community-wide programs to target uninsured, high poverty areas with no/low cost options for food and recreation for all age groups.

The cardiovascular disease mortality rate (per 100,000 population).

Target behaviors through employee wellness program: hands-on cooking classes, parenting classes and "Exercise is Medicine."

Rates of chronic diseases, including type 2 diabetes, high blood pressure, kidney disease and stroke.

Community-wide implementation of health lifestyle "clubs" that are organized, supported, tracked groups who support themselves with following organized activities like exercise, healthy food shares, food preparation and coaching.

The percentage of adults who are current smokers.

Advocate/implement policies to create a smoke-free county.

Number of children and adolescents using JUULs in schools.

Promote anti-vape/anti-smoking campaign in schools.

Number of food deserts in Rowan County.

Establish community gardens, promote farmers markets, advocate for healthy food in corner stores, and seek grants to address food insecurity.

Daily physical exercise for children and adults.

Increase number of sidewalk connections, bike lanes, and improve greenway access.

# Mental Health

Mental health includes emotional, psychological, and social well-being, and is an important part of our lives. It affects how we function, what choices we make and how we interact with others. Mental health and mental illness are related, yet distinct. A person could be experiencing a poor mental health day, where they feel sad or anxious, but not have a mental illness. Mental health can change over time, and at different points in a person's life. Chronic mental illness, especially depression, can put someone at heightened risk for stroke, type 2 diabetes, and heart disease.

**Objective:** To increase the availability, accessibility, and coordination of mental health services to improve the mental health and wellbeing of county residents and reduce suicide mortality.

## Current Conditions

Awareness of mental health needs is rising and stigma is decreasing, BUT stigma is still present.

Insufficient supply of therapists, long-term and emergency mental health services in Rowan County.

Adverse childhood experiences (ACEs) contributing to mental health needs as substance abuse and mental health issues of parents' impact children.

Need for prison-related mental health services and active treatment in jail for the incarcerated population.

Stigma and discrimination, specifically against LGBTQ populations, contributing to mental health needs.

Providers are limited in their understanding of available referrals.

## Measures of Progress

## Proposed Action Plans

The suicide rate (per 100,000 population).

Explore the possibility of an anti-stigma campaign to increase awareness and likelihood to seek treatment.

Average number of poor mental health days among adults in the last 30 days.

Expand free and low-cost services through exploring grant-funded or faith-based services.

The rate of mental-health related visits to the emergency department (per 10,000 thousand).

Establish a Quick Response Team (QRT) including a social worker, police officer, and peer specialist.

Number of court-ordered step-down programs for mental health services with goal to reduce recidivism in incarcerated population.

Initiate a step-down program, 60-90 days out of jail, to help inmates transition back into the community by teaching health care navigation, independent living skills and other related skills.

Explore the Project Re-Entry model for possible expansion in Rowan County.

Create a provider collaborative to increase awareness of programs and facilitate referrals between agencies.

Number of referrals between agencies for mental health services.

Expand agencies involved in mental health work to the school system, prison administration and law enforcement.
